The Concise Guide To Building Sheds:

The Concise Guide to Building Sheds James Barrett,1993-01-01 **The "Canynge" Concise Guide to Bristol and Suburbs** ,1878 **Daylight Design of Buildings** Nick Baker,Koen Steemers,2014-01-02 To complement the critical and

objective view gleaned from the study of some sixty buildings this design manual has been developed to provide a more synthetic approach to the principles which lie behind successful daylight design These principles are illustrated with examples drawn from the case study buildings The emphasis throughout has been on practical methods to improve design rather than techniques studied for any intrinsic interest The book provides the necessary tools to assist the designer to provide well daylit interiors and shows that good daylight design is not a restriction on architectural expression but on the contrary acts as an inspiration and foundation for good architecture **Wind Tunnel Testing of High-Rise Buildings**

Peter Irwin,Roy Denoon,David Scott,2013-06-19 Since the 1960s wind tunnel testing has become a commonly used tool in the design of tall buildings It was pioneered in large part during the design of the World Trade Center Towers in New York Since those early days of wind engineering wind tunnel testing techniques have developed in sophistication but these techniques are not widely understood by the designers using the results As a direct result the CTBUH Wind Engineering Working Group was formed to develop a concise guide for the non specialist The primary goal of this guide is to provide an overview of the wind tunnel testing process for design professionals This knowledge allows readers to ask the correct questions of their wind engineering consultants throughout the design process This is not an in depth guide to the technical intricacies of wind tunnel testing it focusses instead on the information the design community needs including a unique methodology for the presentation of wind tunnel results to allow straightforward comparison of results from different wind tunnel laboratories advice on when a tall building is likely to be sufficiently sensitive to wind effects to benefit from a wind tunnel test background for assessing whether design codes and standards are applicable details of the types of tests that are commonly conducted descriptions of the fundamentals of wind climate and the interaction of wind and tall buildings This unique book is an essential guide for all designers of tall buildings and anyone else interested in the process of wind tunnel testing for tall buildings *Exploring Occupant Behavior in Buildings* Andreas Wagner,William O'Brien,Bing Dong,2017-10-27 This book is the first to comprehensively cover research methods for building occupant behavior As this is of growing importance for building design and for building performance optimization the book aims to provide a sound scientific basis for experimental studies in this field It introduces the reader to fundamental questions about the topic and unfolds the different fields related to occupant actions and comfort This is followed by more general questions about developing an appropriate research method and experimental design A comprehensive overview of sensors for monitoring environmental and also behavioral and action related quantities helps to set up an experiment In this context different experimental environments and data collection methods in situ laboratories surveys are introduced and discussed in terms of their suitability for the respective

research question Furthermore data management and reporting is addressed The book concludes with fundamental challenges in conducting occupant studies with chapters on ground truth ethics and privacy

Measurement and Recording of Historic Buildings Peter Swallow, Ross Dallas, Sophie Jackson, David Watt, 2016-04-01 Now in its second edition this book provides a practical guide to measured building surveys with special emphasis on recording the fabric of historic buildings It includes two new chapters dealing with modern survey practice using instruments and photographic techniques as well as a chapter examining recording methods as used on a specific project case study undertaken by the Museum of London Archaeology Service Measured surveys for producing accurate scaled drawings of buildings and their immediate surroundings may be undertaken for a variety of reasons The principal ones are to provide a historic record and to form the base drawings upon which a proposed programme of works involving repairs alterations adaptations or extensions can be prepared This book provides a practical guide to preparing measured surveys of historic buildings with special emphasis on recording the fabric The text assumes little previous knowledge of surveying and begins by describing basic measuring techniques before introducing elementary surveying and levelling From these principles the practices and techniques used to measure and record existing buildings are developed in a detailed step by step approach covering sketching measuring plotting and drawing presentation For this new edition the text on hand survey methods has been revised to note where new techniques and equipment can be incorporated as well as explaining where more advanced survey methods may be best used to advantage Information on locating early maps and plans aerial photography and its uses documentary research procurement of surveys and conventional photography has been incorporated at various points as appropriate In addition Ross Dallas provides two new chapters dealing with modern survey practice using instruments and photographic techniques Also the opportunity has been taken to present a wider view of building recording projects by including a new chapter from the Museum of London Archaeological Service MoLAS building recording team It encompasses their five key principles for recording within an illustrative case study

Natural Energy, Lighting, and Ventilation in Sustainable Buildings Morteza Nazari-Heris, 2023-11-16 This book explores the theoretical background and provides an experimental analysis of using natural energy resources in sustainable building design It brings together an international group of contributors focusing on ways natural energy lighting and ventilation can improve the performance of electrical lighting and mechanical systems Contributions explore how natural resources can contribute to sustainable development goals while meeting energy demands and maintaining acceptable interior air quality and natural illumination needs Coverage includes green building design renewable energy integration photovoltaic systems small scale wind turbines natural lighting and natural ventilation Natural Energy Lighting and Ventilation in Sustainable Buildings offers practical and promising solutions for novel challenges in sustainable design for electrical engineers energy engineers architectural engineers and related professionals as well as researchers and developers from engineering science
