**Russia and Armed Persuasion** Stephen J. Cimbala, 2001 In Russia and Armed Persuasion Stephen J Cimbala argues that Russia's war planners and political leaders must make painful adjustments in their thinking about the relationship between military art and policy in the twenty first century. Russia must master the use of force for persuasion not just destruction. As the author shows military persuasion requires that Russian leaders master the politico military complexity of crisis management, deterrence and arms control and the limitation of ends and means in war. Russia now has scarce resources to devote to defense and can no longer afford the stick only diplomacy and strategy that have characterized some of its recent past. Russian and Soviet military thinking historically emphasized the blunderbuss and total war, overwhelming mass firepower and conflicts of annihilation or prolonged attrition. However historical experience also forced Russia and the Soviet Union to come to grips with crisis management and with limited aims and means in the conduct of war. On the one hand Russia failed the test of military persuasion in its management of the July 1914 crisis that plunged Europe into World War I. On the other hand the Soviet Union did adjust to the requirements of the nuclear age for crisis management, deterrence and limited war. Using this mixed record of Russian and Soviet success and failure in twentieth century experience Cimbala argues that Russia can and must improve in the twenty first century. According to the author the first decades of this century will pose at least three immediate challenges to Russia's military persuasion. Russia must continue to pursue strategic nuclear arms control and arms reductions with the United States and avoid re-starting the Cold War by means of an ill considered race in missile defenses. Second Russia must maintain a surer grip on the military information revolution especially as it pertains to the management of Russia's nuclear deterrent. Third Russia must develop forces that are more flexible.
