Teaching Green:

Teaching Green Damian Randle,1989 *Exploring Opportunities in Green Chemistry and Engineering Education* National Research Council,Division on Earth and Life Studies,Board on Chemical Sciences and Technology,Chemical Sciences Roundtable,2007-02-12 Going green is a hot topic in both chemistry and chemical engineering Green chemistry is the design of chemical products and processes that reduce or eliminate the use and generation of hazardous substances Green engineering is the development and commercialization of economically feasible industrial processes that reduce the risk to human health and the environment This book summarizes a workshop convened by the National Research Council to explore the widespread implementation of green chemistry and chemical engineering concepts into undergraduate and graduate education and how to integrate these concepts into the established and developing curricula Speakers highlighted the most effective educational practices to date and discussed the most promising educational materials and software tools in green chemistry and engineering The goal of the workshop was to inform the Chemical Sciences Roundtable which provides a science oriented apolitical forum for leaders in the chemical sciences to discuss chemically related issues affecting government industry and universities Integrating Green and Sustainable Chemistry Principles into Education Andrew P. Dicks,Loyd D. Bastin,2019-07-19 Integrating Green and Sustainable Chemistry Principles into Education draws on the knowledge and experience of scientists and educators already working on how to encourage green chemistry integration in their teaching both within and outside of academia It highlights current developments in the field and outlines real examples of green chemistry education in practice reviewing initiatives and approaches that have already proven effective By considering both current successes and existing barriers that must be overcome to ensure sustainability becomes part of the fabric of chemistry education the book's authors hope to drive collaboration between disciplines and help lay the foundations for a sustainable future Draws on the knowledge and expertise of scientists and educators already working to encourage green chemistry integration in their teaching both within and outside of academia Highlights current developments in the field and outlines real examples of green chemistry education in practice reviewing initiatives and approaches that have already proven effective Considers both current successes and existing barriers that must be overcome to ensure sustainability Green Chemistry Education Mark Anthony Benvenuto,Larry Kolopajlo,2018-12-17 The greening of industry processes i.e. making them more sustainable is a popular and often lucrative trend which has emerged over recent years The 4th volume of Green Chemical Processing considers sustainable chemistry in the context of education and explores didactic approaches The American Chemical Society's 12 Principles of Green Chemistry are woven throughout this text as well as the series to which this book belongs Futureproofing Engineering Education for Global Responsibility Michael E.
