Western cultures in contemporary Hong Kong Chinese society She reviews the major educational initiatives carried out in Hong Kong since the 1970s showing how Western educational policies promoting student centric teaching modes have encouraged changes in classroom culture With reference to the observed seventy three lessons the study identified three patterns of teacher student power relations Teacher Domination Relatively Balanced Opportunity for Power Sharing and Student Self Empowerment each involving different degrees of power being exercised by teacher and students The coexistence of these three power patterns and the two corresponding power situations student empowerment and disempowerment can be explained as the result of multileveled intertwined interactions among six factors related to social culture education policy school and classroom contexts and to the individual players concerned The book thus contributes to the understanding of teacher student power relations in the context of Hong Kong by proposing a theoretical framework that reflects local socio cultural educational and school contexts
