**Reshaping Technical Communication** Barbara Mirel, Rachel Spilka, 2002-06-01 This anthology brings together voices from industry and academia in a call for elevating the status, identity, value, and influence of technical communicators. Editors Barbara Mirel and Rachel Spilka assert that technical communicators must depart from their traditional roles, moving instead in a more influential and expansive direction. To help readers explore the possibilities, contributions from innovative thinkers and leaders in technical communication propose ways to redefine the field's identity and purposes and to expand the parameters of its work. The chapters included here all point toward new directions for greater growth and influence of the field. Contributors depart from traditional ideas and solutions and discuss new and, in some cases, radical points provoking further thought and discussion. Its exploration of fresh territory uncovers new research topics and directions and provides an examination of both internal industry-academia relationships and external relationships between technical communicators and other professionals. In its entirety, this collection represents an inclusive vision for the future, targeting such wide-ranging issues as creating effective professional organizations, disseminating research to diverse audiences, transitioning to more influential job roles, exerting leadership in usability, and creating hybrid identities and collaborative programs between industry and academia to support them. The diverse voices from industry and academia will inspire readers to think differently about the discipline's identity and direction and to build on the ideas they find herein to effect change within their own spheres. As required reading for academics and professionals in technical communication, this collection is a critical step in reshaping and reinvigorating the technical communication field to ensure its survival and growth in the 21st century.
