James Webb Young (1965)  
New York, US: McGraw-Hill Professional  
64 pp.

As a key stakeholder who is recognised as a designer of high aesthetic building space as well as a leader and coordinator in conventional architectural project developments, an architect has to be well-prepared for such a challenging task. Skills and knowledge, therefore, have to be constantly renewed and created in the fragmented industry structure. One systematic solution can be learned from the highly creative advertising industry where the right idea is crucial for the success of a task.

This little classic book written by the legendary James Webb Young (1886-1973) in 1965 can be a good start to systematically create new ideas. Contents of the book were written from Young's extensive experience in U.S. advertising from the time he started working at J. Walter Thompson advertising agency as a copy writer in 1912 to the top of his career as a vice president in 1928. They were presented to graduate students at the University of Chicago's Business School where he was a professor from 1931 to 1939 and with a number of gatherings with active advertising people to inspire people to conceive.

In order to develop idea creation capacity by energetic persons who can spot opportunities to make things better, two major principles have to be initially recognised. Firstly, ideas have to be perceived as new combinations of old elements. Secondly, people involved have the ability to see relationship to extract a general principle that a new application and a new combination leading to new idea can be created. Once the two principles are accepted, a 5-stage method to successively create new ideas can be introduced.

**JAMES WEBB YOUNG**

In the very first stage of this sequential research based method, *Gathering of raw materials*, two sets of them has to be explored. The first is a set of specific materials from both primary and secondary sources. They can be found once existing problems, problematic conditions or interesting phenomena are reviewed. For example, specific materials are, in architectural design context, users' space requirements. Moreover, theories, concepts, research findings also have to be reviewed to find potential solutions for such problems. The crucial second set of general materials in a wide scope of topics and issues including life, culture and events has to be consistently developing in a lifelong process to create one's reservoir of information.

Once all information is ready, it is time to *working over materials in one's mind*. Bits of information can be played inside one's head using

**A Technique for Producing Ideas** James Webb Young,1984     **A Technique for Producing Ideas** James Young,2003-02-11 A step by step technique for sparking breakthrough creativity in advertising or any field Since its publication in 1965 A Technique for Producing Ideas has helped thousands of advertising copywriters smash through internal barriers to unleash their creativity Professionals from poets and painters to scientists and engineers have also used the techniques in this concise powerful book to generate exciting ideas on demand at any time on any subject Now let James Webb Young s unique insights help you look inside yourself to find that big elusive idea and once and for all lift the veil of mystery from the creative process James Webb Young is in the tradition of some of our greatest thinkers when he describes the workings of the creative process The results of many years in advertising have proved to him that the key element in communications success is the production of relevant and dramatic ideas He not only makes this point vividly for us but shows us the road to that goal William Bernbach Former Chairman and CEO Doyle Dane Bernbach Inc

**A Technique for Producing Ideas** James Webb Young,2015-07-31 This concise and powerful book lifts the lid on the creative process and eloquently details the steps needed to create exciting new ideas Advertising copywriters engineers poets painters and scientists have all benefited from its text to make creative breakthroughs Advertising trailblazer William Bernbach wrote James Webb Young conveys in his little book something more valuable than the most learned and detailed texts on the subject of advertising Mr Young is in the tradition of some of our greatest thinkers when he describes the workings of the creative process Table of contents How it started The formula of experience The Pareto theory Training the mind Combining old elements Ideas are new combinations The Mental digestive process Constantly thinking about it The final stage Some after thoughts     **A Technique for Producing Ideas** James Webb Young,2013     **A Technique For Producing Ideas**

Young,2004-07-01     **A Technique for Producing Ideas** James Young,2016-07-20 James Webb Young was the first ever chairman of The Advertising Council and he also served as the vice president of the J Walter Thompson JWT Company Beyond this he had great influence over the development and evolution of the early days of the ad industry In 1946 he was named Advertising Man of the Year He was also recognized for his war time impact on the ad industry as he was named as the recipient of the Advertising Awards Gold Medal for Outstanding Achievements of a Lifetime What the book covers How It Started Mr Young reveals what prompted him to create A Technique for Producing Ideas The Formula of Experience He explains how he came to realize and identify the mind s operative technique for generating ideas as effectively and efficiently as an assembly line The Pareto Theory Mr Young discusses Italian sociologist Pareto best known for his 80 20 theory Pareto strongly believes there are two kinds of people in this world the creatives and the squares The creative types called speculators by Pareto are defined by a constant interest in the possibilities of new combinations The other type rentiers are described as conservative steady habitual people Pareto believes that the creatives manipulate the squares Training The

Mind The importance of training your mind in the art of producing ideas using Method and Principles Combining Old Elements An idea is nothing more nor less than a new combination of old elements Mr Young believes this is the most important principle in A Technique for Producing Ideas He then reveals the second most important principle which allows one to make new combinations of old elements and that is the ability to see relationships between disparate things Ideas are New Combinations This chapter introduces you to the Method The Method or Idea Producing Technique is made up of 5 steps Step 1 discusses gathering general and specific raw material Specific raw material is information that centers on your idea The product s specs features benefits competition and marketability General knowledge is important as it gives you more raw material to work with in seeing relationships and making new combinations The Mental Digestive Process This chapter explores the second step of the technique This involves mulching and digesting the raw material you have gathered Young explains you must feel your way through each bit of knowledge Turning it over and over in your mind then extracting multiple meanings and significances Like a jigsaw puzzle you play with different bits of ideas to see how they fit together You will need a notebook to transcribe your thoughts and half ideas as they come to you Sleep is the third stage letting go allows your unconscious mind to deal with it Constantly Thinking About It The fourth step discusses how new ideas just appear when you least expect them Through the entire process of gathering data mulling over your information engaging in other activities your mind will create new ideas without any warning The Final Stage This final stage is your reality check time You must test edit refine and polish your idea This is the time to take your new idea and hold it up to the harsh light of reality Some After Thoughts Mr Young reveals his own personal experiences with these techniques and re emphasizes how new knowledge and experience can lead to new ideas and profitable rewards Why are some people capable of producing great new ideas on demand The book closes with examples and testimonials of past readers and how his method has worked for them You will also receive information on recommended books to further your understanding of the idea producing process

education and research **Art Music** Matthew Del Nevo, 2017-07-28 Listening to music is not merely something one does but something central to a way of living Listening has the power to transport one into another way of being It is a mode of feeling and forms the bedrock of deep emotion Written from the viewpoint of a philosophy of sensibility Matthew Del Nevo notes that this perspective may not be in fashion but it follows a long tradition Del Nevo emphasizes the aesthetic experience of listening to art music as it has developed and disintegrated in Western civilization He recognizes a deep psychological element to what he calls soul or more accurately sensibility He addresses music in a non technical way taking up the powerful art theory of Charles Baudelaire the music philosophy of Schopenhauer and Richard Wagner and takes a strong critical stand against modernist intellectual art music The importance of this book for the musically literate reader is its insight into the metaphysics of nostalgia This comprehension is missing from nearly all musical instruction because we have lost sight of it Del Nevo asserts that this understanding must be brought back into our culture And since this is a book about listening to art music it is no less about sensibility and its cultivation which in its object form we call culture An engaging book Art Music will appeal to those interested in music culture and philosophy
