*Journal of the Construction Division American Society of Civil Engineers. Construction Division,1976* *New Perspectives on Construction in Developing Countries* George Ofori,2012-06-26

Developing countries face the challenge of maintaining economic growth and socio economic development at the core of which sits the construction industry Considerable research on construction in developing countries took place in the 1970 s and 1980 s but little since a gap which this book fills Including contributions from prominent academics and practitioners in Australia China the Netherlands Portugal Singapore South Africa Switzerland and the UK this is a truly international analysis of a subject of global interest The most insightful and relevant of recent research on topics such as Millennium Development Goals the informal construction sector human resource development technology finance and social change are all addressed in the context of the construction industry in the developing world Also considered are other key aspects of construction industry development such as institution building nurturing of contractors and consultants and championing of industry development programmes While the challenge has grown and the needs have become even more pressing the research to date has rarely presented effective solutions Focussing on those

aspects of the construction industry most crucial to development this is a much needed up to date study that sheds new light on a variety of concepts and issues This is essential reading for researchers professionals and students interested in the construction industry in developing countries Readers of this book will be interested in its companion volume *Contemporary Issues of Construction in Developing Countries* *Contemporary Issues in Construction in Developing Countries* George Ofori,2012-06-26 Economic growth and socio economic development are particularly important for developing countries and the construction industry plays a central role in driving both of these Traditionally the issues faced have been assumed to be merely offshoots of those encountered in industrialised nations and are usually discussed only in this context In addition research in construction management and economics has generally failed to take proper account of the unique or highly emphasised characteristics of the industries in developing countries or their economic and social environment This volume challenges underlying assumptions and focuses on the distinct characteristics of construction in developing countries In so doing it considers the issues from the perspective of the developing countries themselves to present a strong contemporary picture for researchers It forms a companion volume to *New Perspectives on Construction in Developing Countries* which provides an update on the generic subjects relating to the construction industry in developing countries and covers new concepts and issues *Which Degree?* ,1977 *Proceedings of the Business and Economic Statistics Section* American Statistical Association. Business and Economic Statistics Section,1961

**The Economics of the Modern Construction Sector** G. Ive,S. Gruneberg,2000-07-31 This book will be of interest to built environment professionals and to students of the economics and management of the built environment It shows the value of integrating ideas and data about the production of the built environment as an industrial process with theories and data about the demand for construction The approach taken is institutional and post Keynesian and illuminates an important and distinctive sector of the economy embracing design construction and property industries This book offers some new and important perspectives for research and teaching in construction economics and management

**Describing Construction** Rick Best,Jim Meikle,2022-09-16 This third book from editors Rick Best and Jim Meikle brings together and presents insights into a number of key concepts in the study of construction firms projects and the group of activities that loosely define the construction industry The value for readers comes from the collection of a variety of topics in a single volume which provide a basic understanding of the complexities of construction as more than a set of practical concerns such as labour management and materials handling Instead the focus is on analysis of the industry and its component parts from the viewpoints of construction economists and others seeking to understand the drivers and challenges that shape an area of economic activity that is a major contributor in all economies The aim of this book is to provide an overview and discussion of several aspects of what makes construction tick It is unlike other industry sectors in many ways being project based with often intense competition for work Where the first book *Measuring Construction* focused on particular areas associated with quantifying various aspects of construction activity and

the second Accounting for Construction looked more at how we record and report on construction activity Describing Construction gives readers the views of experts in the field of how the construction industry is described what its make up is it even asks the question is construction a single industry This book will change the way most readers understand the construction industry whatever that may be not from the point of view of visible on site activities but through a scientific approach to analysis and understanding of how projects firms and various sectors of the industry work and how things are changing and may continue to change in future It is essential reading for students and researchers in construction management quantity surveying architecture and engineering New National Real Estate Journal ,1936 **Roads and Streets** ,1926 Issues for include section Bituminous roads and streets

**Modern Construction Economics** Gerard de Valence,2010-11-10 Modern construction economics has a wider focus than was previously the case with stronger links to mainstream economics reflecting increasing interest in a range of theoretical issues This book brings together the essential reviews of this trend and pushes towards the development of a comprehensive theoretical framework for construction economics

**Public Policy, Bargaining Structure, and the Construction Industry** Joseph B. Rose,1980 Monograph examining effects of government policies on collective bargaining in the construction industry in Canada discusses labour relations collective agreements trade unionism labour disputes strikes wages developments centralization and decentralization of bargaining and trends comments on legislation concerning bargaining unit accreditation and includes a case study of British Columbia and comparison of bargaining structure References and statistical tables The Architectural Forum ,1930 Nigerian Journal of Industrial and Systems Studies ,2002
