The Computational Complexity Of Machine Learning:

The Computational Complexity of Machine Learning Michael J. Kearns, 1990 We also give algorithms for learning powerful concept classes under the uniform distribution and give equivalences between natural models of efficient learnability This thesis also includes detailed definitions and motivation for the distribution free model a chapter discussing past research in this model and related models and a short list of important open problems

Machine Learning and Artificial Intelligence: Concepts, Algorithms and Models Reza Rawassizadeh, 2025-03-15 Mastering AI machine learning and data science often means piecing together concepts scattered across countless resources from statistics and visualizations to foundational models and large language models This book the result of eight years of effort brings it all together in one accessible engaging package It clarifies artificial intelligence and data science blending core mathematical principles with a clear reader friendly approach Unlike traditional textbooks that lean heavily on equations and mathematical formalization the author starts with minimal prerequisites layering deeper math as the reader progresses Each concept algorithm or model is unpacked through clear hands on examples that build the reader's skills step by step It strikes a balance between theoretical foundations and practical application serving as both an academic reference and a practical guide Furthermore the book uses humor casual language and comics to make the challenging concepts and topics relatable and fun Any resemblance between the jokes and real life is pure coincidence and no offense is intended
