Innovation and the Environment Organisation for Economic Co-operation and Development. Working Group on Innovation and Technology Policy, 2000 A workshop proceedings address questions that lead to a better understanding of the interaction between innovation and the environment and explored elements of best practice policies

that can stimulate innovation for the environment and shift our development path towards sustainability **Technology and the Multinationals** Jack Baranson,1978 *Environmental Policy and Technical Change* René Kemp,1997

Environmental Policy and Technical Change assesses the impact of environmental policy on technical change in cleaner technology. It focuses in particular on the possibility of inducing radical change in technology, a topic that is likely to move to the centre of the policy debate as people discover that incremental changes are not enough to achieve environmental sustainability. This innovative book sheds new light on the relationship between clean technology and environmental policy. It adopts an approach which combines a balance of both theoretical models of innovation and diffusion with empirical case studies. Dr Kemp examines policies such as subsidies, tradeable quotas, pollution taxes and emission standards in how they affect technical choices. Suggestions are offered on how environmental policies may be redesigned towards the efficient conservation of environmental qualities by encouraging innovation in environmental benign technology. This important book will be essential reading for both researchers and environmental economists concerned with environmental policy and technical innovation. **Philippine Journal of Public Administration** ,1994 **Review of Economic Dynamics** ,2003
