## **Mastery of Vascular and Endovascular Surgery**

Gerald B. Zelenock, 2006 This new addition to the acclaimed *Mastery of Surgery* series guides readers step by step through all vascular surgical procedures, both open and endovascular. In the tradition of the series, this text atlas is written by the world's master surgeons and richly illustrated throughout with detailed drawings, photographs, and imaging scans. Coverage of each procedure begins with indications, contraindications, preoperative preparation, anatomy, and patient management, followed by step-by-step descriptions of operative technique and pitfalls. For diseases in which open and endovascular approaches are used for different indications, both approaches are presented with discussions of when and why each is preferable. Each chapter ends with an editor's comment.

## **CURRENT VASCULAR SURGERY**

Mark K. Eskandari, 2015-12-31 *Current Vascular Surgery* addresses contemporary topics and controversies in vascular and endovascular surgery, providing a comprehensive overview of the field's recent evolution. The volume is the result of the 40th Annual Vascular Symposium sponsored by the Division of Vascular Surgery, Feinberg School of Medicine, Northwestern University. The symposium was held in Chicago on December 10-14, 2015. The symposium was held at the InterContinental Hotel on Chicago's Magnificent Mile. The symposium brought together over 50 national experts to address timely topics and controversies in vascular and endovascular surgery. As has been the tradition, presentations cover the full spectrum of vascular surgery, including changes in management of extracranial cerebrovascular disease, new treatment options for lower extremity arterial occlusive disease, hemodialysis, improvements in techniques for complex venous disease, and developments in aortic stent graft repair in the chest and abdomen. Each chapter in this volume is based on a presentation, but the book chapters provide deeper, more detailed information than is possible in a symposium presentation.

*Endovascular Technology* Mark K. Eskandari, James S. T. Yao, 2011 *Endovascular Technology* is a compilation of presentations on topics relating to endovascular topics from the last five symposia sponsored by the Division of Vascular Surgery at the Feinberg School of Medicine, Northwestern University, in Chicago, Illinois. The *Modern Trends in Vascular Surgery* series brings together the best current strategies for therapeutic and clinical practices. These books contain the latest discoveries, techniques, practice, and outcomes in vascular surgery. Each of the chapters contains

valuable illustrations tables and a list of references to guide the reader through the chapter This series of books focus on specific topics in vascular surgery For each title the editors will assume the responsibility of adding the latest information and new chapters and to update all of the content thus making these books more cohesive and with newer up to date information The resulting product is a comprehensive review of current knowledge across all of vascular surgery covering Carotid Artery Diseases Surgery of the Aorta Venous Disorders Endovascular technology and Ischemic Extremities
