**Productivity: Information technology and the American growth resurgence** Dale Weldeau Jorgenson,Mun S. Ho,Kevin J. Stiroh,1995 A study of information technology and economic growth since 1995 that tracks the American growth resurgence to its sources within individual industries The American economy has experienced renewed growth since 1995 with this surge rooted in the development and deployment of information technology IT This book traces the American growth resurgence to its sources within individual industries documents the critical role of IT and shows how U S nvestment in IT has important parallels in other developed countries In analyzing the experience in the United States the authors identify four IT producing industries 17 IT using industries and 23 non IT industries and show that the IT producing and IT using industries play a disproportionate role in the American growth resurgence These industries account for only about 30 percent of US GDP but contributed half of the acceleration in economic growth The study finds that differences in the relative importance of IT producing industries in other G7 countries have contributed to wide disparities in the impact of IT on economic growth Productivity Volume 3 will be of special interest to analysts of the new economy and its remarkable persistence through periods of boom and recession    **Technology for America's Economic Growth** Bill Clinton,Al Gore,United States.
