Technology Transfer and Innovation for Low-Carbon Development Miria Pigato, Simon Black, Damien Dussaux, Zhimin Mao, Ryan Rafaty, Simon Touboul, 2020-04-09 Technological revolutions have increased the world's wealth unevenly and in ways that have accelerated climate change This report argues that achieving The Paris Agreement's objectives would require a massive transfer of existing and commercially proven low carbon technologies LCT from high income to developing countries where the bulk of future emissions is expected to occur This mass deployment is not only a necessity but also an opportunity Policies to deploy LCT can help countries achieve economic and other development objectives like improving human health in addition to reducing greenhouse gases GHGs Additionally LCT deployment offers an opportunity for countries with sufficient capabilities to benefit from participation in global value chains and produce and export LCTs Finally the report calls for a greater international involvement in supporting the poorest countries which have the least access to LCT and finance and the most underdeveloped physical technological and institutional capabilities that are essential to benefit from technology

Development Through Technology Transfer Mohammed Saad, 2000 This study in technology transfer uses company specific examples to enrich an exploration of the complex and dynamic issues involved Focusing on the experience of companies in Algeria it describes technology transfer as more than the hand over of new technology hardware

Technology Transfer to Developing Countries Thomas J. Allen, 2015-08-05 Excerpt from Technology

Transfer to Developing Countries The International Technological Gatekeeper A questionnaire was developed and administered to the research personnel of An Foras Taluntais the Irish agricultural research and development organization to study the operation of communications channels for the international transfer of technological information The techniques employed are consistent with those used in previous studies of the purely domestic flow of technological information into American research and development laboratories Results of the study show that the international transfer like domestic transfer takes place in a two step process operating through certain intermediary agents called technological gatekeepers These technological gatekeepers must be well integrated into two information networks an external network of information sources and an internal network of users to whom the information can be delivered Possible strategies for gatekeeper development are discussed About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Strategic Planning in Technology Transfer to Less Developed Countries Christian Madu, 1992-01-27 Despite an avalanche of literature over the last 30 years there has been relatively little written on the role played by strategic planning in the transfer of technology particularly from developed to less developed countries Technology transfer which involves the acquisition of inventive activity by secondary users is conceded vital to socio economic growth but usually it is looked at internationally from a micro perspective Unlike other books Madu's volume looks at technology transfer holistically It examines the advantages of technology transfer and its limitations by viewing recipient nations as systems in which social economic behavioral and political influences converge to help shape technological decisions Only when a systems perspective like this is adopted and technology seen as a strategic variable can technology transfer be understood and successfully implemented says Madu Madu thus identifies the failures of technology transfer as the result of malfunctions in three components of the system technology structure and behavior He analyzes these malfunctions offers ways to repair them and considers technology from the viewpoints of both transferrer and receiver whose missions goals and objectives are often not only disparate but sometimes in conflict He then offers what he calls prescriptive frameworks and guidelines to help implement transfer and to see it as a variable that must be integrated into national development planning Throughout Madu makes it clear that the objective of technology transfer is the maximizing of social welfare Using this overarching premise he is able to evaluate both the benefits and the social costs associated with technology transfer and to develop his prescriptive integrative models Intended for specialists in international finance and development and international business management Madu's book will be of special value to
