Technology Transfer George K. Manning,1974 **Proceedings & Reports of Seminars and Research Conducted Within the Center for Yugoslav-American Studies, Research and Exchanges** Florida State University. Center for Yugoslav-American Studies, Research, and Exchanges,1978 **Technology Transfers and Non-Proliferation** Oliver Meier,2013-09-05 This edited volume examines the issue of the proliferation of dual use technology and the efforts of the international community to control these technologies Efforts to stop the spread of weapons of mass destruction WMD increasingly focus on preventing the proliferation and misuse of dual use technologies information materials and equipment that can be easily applied for peaceful and hostile purposes The threat of terrorist attacks with nuclear biological or chemical weapons in particular makes it necessary to develop a sustainable non proliferation policy that effectively hinders the misuse of dual use technologies In this book leading non proliferation experts from different regions of the world reflect on the political legal and technical obstacles with an aim to finding a better balance between control and cooperation in dual use technology transfer regulations This broad approach makes it possible to compare regimes which may be structurally different but are similar in the way they attempt to regulate dual use technology transfers by balancing controls and cooperative approaches This book will be of much interest to students of weapons proliferation arms control global governance international organizations and international security *Technology Transfer* G. Munro,2019-04-17 The Accelerating Transport Innovation Revolution A Global Case Study based Assessment of Current Experience Cross sectorial Effects and Socioeconomic Transformations offers a comprehensive view of current state of the art and practices around the world to create innovation on a revolutionary scale and connect research to commercial exploitation of its results It offers a fascinating new model of the innovation process based on theories of

biological ecosystems general systems theory and basins of attraction represented through space time graphs well known in mathematics Furthermore it considers through a number of dedicated chapters key issues and elements of innovation ecosystems such as Causal Factors and system constraints affecting the development and sustainability of innovation ecosystems Chapter 4 Review of innovation organization and governance in key countries and regions Chapter 5 the role of technological Spillovers Chapter 6 Collection and use of data for innovation monitoring and benchmarking Chapter 7 Intellectual Property protection between competing ecosystems Chapter 8 Economics of innovation Chapter 9 Public and private sector involvement in Transport innovation creation Chapter 10 the role of the individual entrepreneur innovator in energizing change Chapter 11 Finally in Chapter 12 there is a thorough summary of key findings This book uses a paradigmatic approach to augment the innovation ecosystem model of innovation that integrates beliefs and learning into the innovation ecosystems model It therefore includes ten case studies from the U S Europe and Asia detailing how innovation is created across continents and different ecosystems and what are the critical lessons to be learned It does this effectively at five different levels of analysis i e the individual innovator entrepreneur level the organization level government agency or company the regional ecosystem level the nation state level and the global systemic or international level Each level of analysis reveals unique features of the innovation landscape and the ten case studies allow the reader to assess when and where specific enablers are facilitating innovation especially on a revolutionary scale The need for the book came from the realization that despite the billions of dollars spent on various research programs over the past 20 years especially in the public sector there have been few clear and tangible efforts directed at exploring how innovation production increasingly occurs and the critical factors necessary to sustain large scale revolutionary change as the future unfolds Thus a primary theme of the book is that understanding how research results translate into market innovation and implementation especially understanding the nature of revolutionary innovation is as important as the creation of innovations themselves While the focus of the book is on Transportation the concepts and recommendations presented apply to other fields too

him Director of JPL And then suddenly the world changed In October 1957 the Sputnik satellite startled the world with its spectacular demonstration of Soviet supremacy in space Pickering led an intense JPL effort that joined with the von Braun and Van Allen teams to answer the Soviet challenge Eighty three days later on 31 January 1958 America s first satellite roared into Earth orbit A few months after that Pickering s decision to affiliate JPL with the newly formed National Aeronautics and Space Administration set the basis for his subsequent career and the future of NASA s ambitious program for the exploration of the solar system In the early days of the space program failure followed failure as Pickering and his JPL team slowly ascended the learning curve Eventually however NASA and JPL resolve paid off First the Moon then Venus and then Mars yielded their scientific mysteries to JPL spacecraft of ever increasing sophistication Within its first decade JPL built spacecraft sent back the first close up photographs of the lunar surface while others journeyed far beyond the Moon to examine Venus and return the first close up views of the surface of Mars Later even more complex space missions made successful soft landings on the Moon and on Mars Pickering s sudden death in March 2004 at the age of 93 was widely reported in the U S and overseas As one NASA official eulogized him His pioneering work formed the foundation upon which the current program for exploring our solar system was built On this the 50th anniversary of the beginning of the Space Age it is proper to remind ourselves of the ordinary people who met the extraordinary challenge to make it happen most of this is from the left inside flap of the dust jacket r
