#### **Telepathy** W. W. Baggally,2016-12-20

My friend Mr W W Baggally an experienced investigator of supernormal phenomena has set down some of his experiences in connection with the subject of Telepathy and I heartily commend his book to the public as the record of a careful conscientious and exceptionally skilled and critical investigator It

would be difficult to find anyone more competent by training and capacity to examine into the genuineness of these subtle and elusive phenomena which yet are of the utmost importance in the development of psychological science Telepathy or the direct action of mind on mind apart from the ordinary channels of sense opens a new chapter it is not a coping stone completing an erection but a foundation stone on which to build Oliver J Lodge I trust that what I have written will act as an incentive to some of my readers to try experiments in this branch of psychical research It is not enough that a few individuals by patient inquiry and experiment should have been convinced of the reality of telepathy What is wanted is that scientific men generally by the record of an overwhelming number of experiments under the strictest test conditions should be convinced of its truth Once let them be so then public conviction will in due time follow Meanwhile I feel bound to state that in spite of initial improbability the experiences which I myself have had as partly narrated in this book especially those briefly summarized in Part I have convinced me that the telepathic faculty does exist and that its detection is a genuine extension of scientific knowledge though much more will have to be done before the bare fact receives its explanation and is permanently incorporated in a coherent system of Science W W Baggally Member of the Council of the Society for Psychical Research

T. H. Pasley, 2022-06-03

In The Philosophy Which Shows the Physiology of Mesmerism and Explains the Phenomenon of Clairvoyance T H Pasley delves into the intricate relationship between mesmerism a popular 19th century practice and its physiological implications This scholarly work combines rigorous scientific inquiry with philosophical reflections positioning itself within the rich intellectual milieu of the time that sought to bridge the gap between empiricism and metaphysical speculation Pasley's exploration not only explicates the mechanisms underlying mesmerism but also addresses the enigmatic experiences of clairvoyance prompting readers to reconsider the boundaries of consciousness and perception T H Pasley was a noted figure in the fields of psychology and metaphysics deeply influenced by the scientific discoveries and philosophical debates of his era His background in medicine and fascination with the mind body connection sparked his pursuit of understanding how mesmerism could elucidate broader philosophical questions This inquiry was undoubtedly shaped by contemporary movements in psychology as well as prevailing interests in spiritualism and the human psyche making his work a significant contribution to these domains I wholeheartedly recommend Pasley's insightful work to scholars and general readers alike who are eager to explore the intersections of science philosophy and the mystical undercurrents of human experience Its historical context provides invaluable perspectives on both mesmerism and the evolving understanding of

(William Wortley) Baggally,2018-08-13 **Telepathy Genuine and Fraudulent** by W W William Wortley Baggally PART I GENUINE TELEPATHY Sir William F Barrett, one of the founders of the Society for Psychical Research, more than forty years ago, tried some experiments which led him to believe that something then new to science which he provisionally called thought transference and which is now known as telepathy really existed. At

the first general meeting of the Society on the 17th July 1882 he read a paper entitled First Report on Mind Reading Since that date the Society has carried out a great number of experiments which tend to show that telepathy is a scientific fact The evidence for its existence is twofold that which can be gathered experimentally and that which arises spontaneously To the first category belong those experiments in the transmission of the images of drawings or diagrams by means of an effort of the will of a person known as the agent to the mind of another person designated the percipient when the transmission is carried out otherwise than through the ordinary channel of the senses To the second category belong those hallucinations of seeing a person at the moment of death or at a crisis evidence for which has been obtained abundantly by the Society for Psychical Research and has been embodied in the work Phantasms of the Living and in the Census of Hallucinations a report on which appeared in the Proceedings of the Society in 1894 We are delighted to publish this classic book as part of our extensive Classic Library collection Many of the books in our collection have been out of print for decades and therefore have not been accessible to the general public The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature and our view is that this is a significant literary work which deserves to be brought back into print after many decades The contents of the vast majority of titles in the Classic Library have been scanned from the original works To ensure a high quality product each title has been meticulously hand curated by our staff Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work We hope that you will enjoy this wonderful classic work and that for you it becomes an enriching experience     **The Occult Review** ,1917
