## **Technology And The Spirit:**

**The Religion of Technology** David F. Noble, 2013-01-23 Arguing against the widely held belief that technology and religion are at war with each other David F Noble's groundbreaking book reveals the religious roots and spirit of Western technology. It links the technological enthusiasms of the present day with the ancient and enduring Christian expectation of recovering humankind's lost divinity. Covering a period of a thousand years, Noble traces the evolution of the Western idea of technological development from the ninth century when the useful arts became connected to the concept of redemption up to the twentieth when humans began to exercise God-like knowledge and powers. Noble describes how technological advance accelerated at the very point when it was invested with spiritual significance. By examining the imaginings of monks, explorers, magi, scientists, Freemasons, and engineers, this historical account brings to light an otherworldly inspiration behind the apparently worldly endeavors by which we habitually define Western civilization. Thus we see that Isaac Newton devoted his lifetime to the interpretation of prophecy; Joseph Priestley was the discoverer of oxygen and a founder of Unitarianism; Freemasons were early advocates of industrialization and the fathers of the engineering profession; Wernher von Braun saw spaceflight as a millenarian new beginning for humankind. The narrative moves into our own time through the technological enterprises of the last half of the twentieth century: nuclear weapons, manned space exploration, Artificial Intelligence, and genetic engineering. Here the book suggests that the convergence of technology and religion has outlived its usefulness; that though it once contributed to human well-being, it has now become a threat to our survival. Viewed at the dawn of the new millennium, the technological means upon which we have come to rely for the preservation and enlargement of our lives betray an increasing impatience with life and a disdainful disregard for mortal needs. David F. Noble thus contends that we must collectively strive to disabuse ourselves of the inherited religion of technology and begin rigorously to re-examine our enchantment with unregulated technological advance.

**Technology & Spirituality** Stephen K. Spyker, 2012-11-01 Can you live a spiritual life in a hyperconnected world? Technology is part of what defines us; it's part of what makes us human. More than that, the technologies we adopt affect the very type of humans we become. The tools we choose to use and how we use them affect how we think, how we make decisions, how we relate to one another, how we construct knowledge, even how we think about God. From the Introduction: Every day new technologies affect your life at home, at work, and at play. But how often do you pause to consider how your computer, mp3 player, cell phone, or PDA influence your spiritual life, your beliefs, your faith, your fundamental understanding of God? With wit and verve, Stephen Spyker leads you on a lively journey through the many ways technology impacts how we think about faith and how we practice it. He explores the role of new spiritual communities, the personal relationships we have with our gadgets, our changing expectations, helping you to think about the many often subtle ways technology has seeped into every aspect of our lives and changed the way we do faith. Can online churches replace traditional houses of worship? Will my iPod give me peace of mind? Is technological convenience undermining

our ability to create community and make commitments Whether a technophile or technophobe no matter your faith or background this book will entertain and challenge you while encouraging you to take a fresh look at spirituality in our modern world    **Spirit Tech** Wesley J. Götz,2001-08-30 Most contemporary accounts of the role of technology in world culture are alarmist and at times condemn many uses of technology without much effort to get beyond the surface of this worldwide phenomenon Technological innovations that might rightly be critiqued are taken as representative of the entire field of technology On the other hand there are those including some scientists for whom technology and its uses pose no questions at all and who seem to delight in predictions of a future totally dominated by technology They prey on the human delight in newness and innovation and on our readiness to be surprised by what may someday come to be Gtz takes the position that so called technology problems are really our problems not the fault of technology Technology is an integral part of what we are as human beings a significant aspect of our evolution Gtz also advances the thesis that technology may be viewed from the perspective of the human capacity to grow and that when we do so we are in effect spiritualizing technology and rendering it more meaningful to ourselves Gtz suggests several models that may be employed to achieve this spiritualization This provocative analysis will be of interest to general readers as well as scholars students and researchers

**The Digital God** William Indick,2015-02-28

As humans charge up the steep slope of technological innovation digital age media increasingly shapes our perception of everything even spiritual matters The next stage of spiritual development may be the product of a digital interface between our own image of the divine virtual reality technology that produces real perceptions and with devices that stimulate areas of the brain associated with spiritual experience This book explores the influence of digital media on spirituality and the impact of the digital environment on our experience of the spiritual world The author predicts a future in which digital technology and neuroscience will combine to create a new understanding of the divine Instructors considering this book for use in a course may request an examination copy here

[Spirits in the Material World](#) Gil Germain,2009-10-26 In [Spirits in the Material World](#) The Challenge of Technology Gil Germain provocatively argues that humans are fast becoming spirit like creatures beings who assume their bodies are incidental to what it means to be human and the real world an accidental quality of the human condition Technology it is suggested authorizes such an understanding and legitimates a manner of action that obscures the centrality of embodiment Technology properly understood is thus an otherworldly or spiritual force [Spirits in the Material World](#) challenges the assumptions underpinning the technological world view through a reading of leading contemporary theorists who have addressed the interconnection between technology and embodiment The book both reveals and contests the multifarious ways in which technology's spiritual thrust is manifested in contemporary thought and practice While respecting technology's hold on modernity and its predisposition toward disembodyment Germain gives important reasons why this inclination toward spiritization ought to be resisted and what shape this resistance must take if it is to be meaningful [Spirits in the Material World](#) will appeal to a broad spectrum of scholars and students alike especially those interested in philosophy of technology postmodernism political theory phenomenology the end of history debate and deep ecology

book is to offer to philosophers and students abroad who show a great interest in Japanese philosophy and the philosophy of the Kyoto school major texts of the leading philosophers This interest has surely developed out of a desire to obtain from the thought of these philosophers who stood within the interstice between East and West a clue to reassessing the issues of philosophy from the ground up or to drawing new creative possibilities The present condition seems to be however that the material made available to further realize this kind of intellectual dialogue is far too scarce This book is intended to be of some help in this regard The book presents selected texts of representative philosophers of the Kyoto school such as Nishida Kitaro Tanabe Hajime Miki Kiyoshi Nishitani Keiji and others who best illustrate the characteristics of this school and works that together portray its image as a whole Those who are interested in Japanese philosophy or specifically the philosophy of the Kyoto School can survey a comprehensive representation from this book These texts are of course quite difficult and cannot be well understood without sufficient preliminary knowledge Expository essays have therefore been included after each text to provide guidance In each of these commentaries a scholar of our time with deep understanding of the philosopher in question has provided an account of his life intellectual journey and the significance of the text included here From this book will emerge a new dialogue of ideas that in turn will engender new developments in philosophy thereby further expanding the network of philosophical thought worldwide
