Technology School Design Creating Spaces For Learning:

Technology & School Design Richard W. Hardt, 1998 Schools facing deteriorating conditions high costs and outdated building designs are tapping into the special capabilities of information technology to address the learning needs of their students This book guides school leaders through school facility planning and technology systems planning describing the importance of long range planning and revealing the decision making faced by some school leaders who have led successful facility design efforts It recommends a seven step process that distinguishes what facilities a school district needs and how to gain community support The book also examines how to select an architectural firm and how to work with it to create educational specifications and building designs that accommodate technology use including the design of technology rich spaces such as media centers Concluding chapters define the infrastructure options school leaders can choose from and examine the step by step approach of a bond issue campaign a school district may need to fund new and remodeled facilities A list of recommended resources glossaries of architectural and technology infrastructure terms and National School Boards Association's publications and ordering forms are provided

Learning: A Critical Reader Anne Boddington, Jos Boys, 2012-01-01 Learning Spaces is an emerging field fuelled by a growing interest in the relationships between learning and spaces in which it takes place whether conceptual personal social physical and or virtual It is concerned with making learning spaces that can better meet the needs of 21st century learners academics and other related publics In post compulsory education this has opened up many interesting and important issues There remains a lack of any theoretical understanding as to how such spaces should be conceived or designed and hardly any critical discussion about effective frameworks for either the development of contemporary learning spaces or for assessing their impact on learning teaching and research At the same time there is much debate about what the purposes of post compulsory education should be as well as concerns about where and by whom it should be provided We therefore need to urgently improve our understanding of the interactions between learning and space It is essential that we not only share perspectives theories and methodologies but also critically reflect on our own different assumptions and work together to build better models for post compulsory education in the future To help in this process this book is designed as a critical reader that can enable researchers academics students and managers involved in Learning Spaces to share and engage with some key ideas issues and texts A central aim is to bring together some of the best research from across the many different disciplines concerned with learning spaces including education architecture anthropology human computer interaction estate planning and museum studies Reshaping Learning is thus intended for anyone interested in and wanting to think more about learning spaces whether as users clients or managers or who are want to better understand interactions between the social and the spatial
