Alan Fine,Rebecca R. Merrill,2011-10-06 According to Alan Fine every one of us has the capacity for greatness So what is it that s stopping us from reaching our true potential The answer too much information Most people who want to get better at hitting golf shots negotiating with clients delivering presentations or any field of endeavour seek out new information They read a book take a class employ an expert tutor But as Alan Fine has learned from many years of coaching athletes and businesspeople this outside in approach often doesn t produce the results people want More information becomes a distraction rather than a solution and high performance remains elusive Fortunately there is a better way Fine has developed and honed a unique inside out approach to performance improvement which is not about gaining new knowledge but instead about using the knowledge you already have Through a simple four step process Fine shows how to remove the obstacles that get in the way of applying your existing skills to unlock your natural potential No matter who you are or what you do this book will help you get better

Straight to the Point Julie Leibrich,1993 Based on interviews with randomly selected former offenders this book takes a fresh look at the course and nature of crime It cuts across theorising trying to understand what people actually experience why they do what they do and to get a picture of successful change As the Justice Department s Centennial Fellow Dr Leibrich tracked down fifty offenders who had been sentenced to supervision in 1987 and not reoffended three years later She asked them why not The people who participated in the interviews did so because they wanted to and their stories make

this a moving piece of research The author soon found that going straight was curved that the people she interviewed did not fall into such neat categories as straight and crooked Her methodology which she describes in detail in the appendices needed to grapple with the many subtleties of her material and drew on different kinds of research strategies utilising their strengths In an exciting account of her approach to problem solving on the basis of trial and error and intuition the reader gains insight into the personal experience of the research process the pitfalls and highlights the frustration and anxiety of data collection Will I find Trinity Is the guy I m going to meet really okay Do I include people who have reoffended Does my write up reflect people s real experience The result this book is tight and rigorous in its analysis but does justice to the richness and warmth of the data valuing the words and actions of the people who participated in the study BOOK JACKET
