The Auction Sale:

The Auction Marketing of Flue-cured Tobacco Clarence I. Hendrickson, 1955 Consumer Protection and Online Auction Platforms Christine Riefa, 2016-03-03 Online auctions have undergone many transformations and continue to attract millions of customers worldwide. However, these popular platforms remain understudied by legal scholars and misunderstood by legislators. This book explores the legal classification of online auction sites across a range of countries in Europe. Including empirical studies conducted on 28 online auction websites in the UK, the research focusses on the protection of consumers' economic rights and highlights the shortcomings that the law struggles to control. With examinations into important developments including the Consumer Rights Directive and the latest case law from the CJEU on the liability of intermediaries, Riefa anticipates changes in the law and points out further changes that are needed to create a safe legal environment for consumers whilst preserving the varied business model adopted by online auction sites. The study provides insights into how technical measures as well as a tighter legislative framework or enforcement pattern could provide consumers with better protection in turn reinforcing trust and ultimately benefiting the online auction platforms themselves.

The Sale of Misattributed Artworks and Antiques at Auction Anne L. Bandle, 2024-11-08 In this thoroughly revised second edition, Anne Laure Bandle explores the process of attribution of artworks and antiques at auction and the commercial directive of auction houses when authenticating art and protecting themselves against misattributions. Bandle provides an extensive study of the phenomenon of sleepers through an in-depth analysis of the contractual relationships, liabilities, and remedies that arise in the context of auction sales.

Legal Theory of Auction Kristijan Poljanec, 2022-09-09 The widespread understanding of auction structure considers auction as consisting of three contracts: contract between the seller and the auctioneer, contract between the auctioneer and the buyer, and the sale contract between the seller and the buyer. The book challenges this concept, arguing that the traditional tripartite concept of auction is too narrow and does not correspond to the actual structure of auction relations. Demonstrating that an auction structure consists of a plethora of legal relationships, including noncontractual relations, this book explores the legal concept of auction sale and the structure of accompanying relations. The book provides a historical overview of auctions and different auction models. Following a brief introduction to the economic theory, auction models are examined against the following legal criteria: price formation, publicity, parties, autonomy, legal form, and applied technology, to find a legal concept and nature of auction. The book explores the legal position of key auction figures and auction objects to identify the categories of legal relations that appear at auction. It explores the legal nature of the main contract as well as the relations between the consignor and the auctioneer, the auctioneer and the bidders, the bidders themselves, the consignor and the bidders. The book covers relations arising from *droit de suite*, financial and bidding agreements, to provide a comprehensive overview of lesser-known legal relations that commonly arise in auction practice.
