## **The B 24 Liberator:**

*B-24 Liberator Bomber Pilot's Flight Manual* Periscope Film Com, 2009-10-19 The Consolidated B 24 Liberator first saw combat in June of 1942 making a daring raid into Nazi occupied Romania to bomb the oil fields at Ploesti. Nearly 18 500 Liberators were built during the war years making it by far the most produced American combat aircraft. It served in many roles beyond heavy bomber transport and anti submarine patrol and flew in Africa Europe India the Atlantic India and the Pacific Theatre. Originally printed by the United States Army Air Force in 1942 the B 24 Liberator Pilot's Flight Operating Manual taught pilots everything they needed to know before entering the cockpit. Originally classified Restricted the manual was declassified long ago and is here reprinted in book form. This affordable facsimile has been reformatted and color images appear as black and white. Care has been taken however to preserve the integrity of the text.

*A History Of The B-24 Liberator in Over 300 Photographs, Stories And Analysis: Including The U.S. Army Air Forces in World War II: Combat Chronology 1941 - 1945 - American Air Power in WWII*, 2015-07-28 PREFACE The chronology is concerned primarily with operations of the US Army Air Forces and its combat units between December 7 1941 and September 15 1945. It is designed as a companion reference to the seven volume history of The Army Air Forces in World War II edited by Wesley Frank Craven and James Lea Cate. The research was a cooperative endeavor carried out in the United States Air Force historical archives by the Research Branch of the Albert F Simpson Historical Research Center. Such an effort has demanded certain changes in established historical methodology as well as some arbitrary rules for presentation of the results. After International and US events entries are arranged geographically. They begin with events at Army Air Forces Headquarters in Washington then proceed eastward around the world using the location of the headquarters of the numbered air forces as the basis for placement. For this reason entries concerning the Ninth Air Force while operating in the Middle East follow Twelfth Air Force. When that headquarters moves to England in October 1943 the entries are shifted to follow Eighth Air Force. The entries end with those numbered air forces which remained in the Zone of the Interior as well as units originally activated in the ZI then designated for later movement overseas such as Ninth and Tenth Air Forces. The ZI entries do not include Eighth and Twentieth Air Forces which were established in the ZI with the original intent of placing them in those geographical locations with which they became historically identified. For these two units original actions are shown either under AAF or in their intended geographic area of location. All times and dates used are those of the area under discussion. The entry 1 2 Jun indicates that an event occurred during the night between the two given dates while 1 2 Jun indicates an action over a period of time. In dealing with people again arbitrary decisions were implemented. For military men below the general officer or equivalent level full grade and name were used. For general officers and those of equal grade in other US and foreign services the complete rank both that at the time first mentioned and the highest rank held prior to the end of the war and name will be found in the index. Only an abbreviated rank e g Gen or Adm and last name are used in the text. The

exception is where two general officers had the same last name in such cases the first name is also included Similarly for civilian leaders only the last name is used full name and title are given in the index Location of all towns islands etc is also made in the index In all cases attempts were made to cite place names in use by the native population at the time of or immediately before the war No names imposed by a conqueror are used For example Pylos Bay not Navarino Bay is used Further as appropriate native geographic terms are used Shima for island in Japanese island groups See for lake in Germany However two exceptions were made In cases in which the place became infamous because of the actions of the conquering power that name is preferred for example Auschwitz would be used rather than the Polish name of Oswiecim Also in larger international cities such as Roma Keln and Wien the anglicized name is used Where a village or hamlet was difficult to locate or where there were several such places with the same name in a general area the coordinates are given in the index In some cases with no extant navigational aids of the attacking force the best possible guess was made based upon all available evidence In other instances such as the bridge at Hay ti attacked so often by Tenth Air Force a logical guess could not be made In these cases a question mark is placed in brackets after the index entry Accent marks such as umlauts were omitted

pictorial history of the American World War II bomber examining its design engineering development and tactical use The Consolidated B 24 Liberator was almost certainly the most versatile Second World War Bomber Apart from its bombing role in all theatres of operation the B 24 hauled fuel to France during the push towards Germany carried troops fought U boats in the Atlantic and probably most important of all made a vital contribution towards winning the war in the Pacific Its most famous single exploit is possibly the raid on the Ploesti oilfields in August 1943 The B 24 ended World War Two as the most produced Allied heavy bomber in history and the most produced American military aircraft at over 18 000 units thanks in

large measure to Henry Ford and the harnessing of American industry It still holds the distinction as the most produced American military aircraft The B 24 was used by several Allied air forces and navies and by every branch of the American armed forces during the war attaining a distinguished war record with its operations in the Western European Pacific Mediterranean and China Burma India theatres This book focuses on the design engineering development and tactical use of the many variants throughout the bomber s service life The overall result is as David Lee the former Deputy Director of the Imperial War Museum at Duxford said upon reading the final manuscript to be acquainted with all you never knew about the B 24 The book is enlivened by the many dramatic photographs which feature and this coupled with the clarity of Simons prose makes for an engaging and entertaining history of this iconic Allied bomber a key component in several of their biggest victories and a marvel of military engineering     *Famous Aircraft* Steve Birdsall,1968
