Take A Picture

**H Kauffman**

## Take A Picture:

**Take Great Photos with Your Digicam** Chaminda de Silva,2010-03-08 With the advancement of digital camera technology we can now buy a digital camera at a reasonably low price take photos at little or no cost and share them quickly with others These cameras are easy to use so you don t really have to learn much to use them However you will sometimes see that some of the photos did not come out as well as you liked them to You will also see that some others take better photos than you do with cameras that are similar to yours In this book I tried to describe some simple guidelines that help you to take better photos without expensive equipment or a deep technical knowledge I learned most of these guidelines the hard way by making a lot of mistakes looking back at my photos observing how other people take photos and experimenting I tried to write them in a style that is easy to read using examples wherever possible I hope this book will help you to learn what I know in much less time than I took and in future take much better photos than I do

**Art on Fire** Yun Ko-eun,2025-09-11 A darkly comic and compelling satire of the art world from the author of *The Disaster Tourist* An Yiji s career had been stalling for some time when a representative of the illustrious Robert Foundation offers her a spot on their all expenses paid artist residency in California The residency has launched many famous artists careers so she knows she can t waste this opportunity Still she feels reluctant to accept and with good reason the foundation s patron is a small dog named Robert known for both his talent as a photographer but also his arrogance Moreover the offer comes with a condition on the last day of the residency one of An s paintings must be incinerated and Robert gets to select which one When An reaches California she finds the state ablaze with wildfires but at the Foundation all is calm She navigates awkward dinners with Robert tries to find inspiration while being bombarded with sponsors who all want their business to be the subject of her art and despairs at the prospect of her work being set on fire Was coming to California a huge mistake

*Popular Photography* - ND ,1946-07    *English Mechanic and Mirror of Science and Art* ,1893    **Photographic Times and American**

**Photographer** ,1896    **The Process of Learning about Static Electricity and the Role of the Computer Simulator**

Valerie K. Otero,2001 The concepts investigated in this study stemmed from two things First a pilot study where we found that the static electricity simulator results coupled with the CPU pedagogical structure provided facilitated the articulation and sharing of ideas in a small group of three students From this we hypothesized that the simulator tools played a role in knowledge construction and we wanted to find out more about what role it played Second the past ten years of research in mathematics and science education has led to the recognition of the importance of the instructional setting collaboration and cognitive tools in the construction of knowledge A tradition has emerged where researchers have begun to look at the individual s knowledge construction through a different lens than the knowledge that emerges through group interactions From this type of research we can learn about the knowledge construction of the individual and the knowledge construction of the group We can understand how the interactions within the group have influenced the knowledge development of the

individual However we cannot learn about how the individual influences the group parameters Repeated interactions between individuals and tools can fundamentally change the social and material setting We need to look at how the social and material setting changes as a result of the individuals interaction with it and how this changing social setting influences the conceptual development of the individual Investigating interdependent interaction between the individual and the social and material setting is the foundation for this work I believe that understanding learning requires more than understanding the individual and understanding the social environment of which he was a part Understanding learning means understanding how the individual changes the social and material setting and how these changes influence the individual This dissertation is devoted to understanding individuals learning the factors that influenced it and further understanding how these factors were determined by the knowledge evolution of the individual
