## **The Austrian Example:**

*The Austrian Example* Kurt Waldheim,1973    *The Austrian Example* Kurt Waldheim,1973    **The Austrian Party System** Anton Pelinka,Fritz Plasser,2019-09-05 First published in 1989 Political science in Austria is a relatively young discipline It began to gradually establish itself in the 60 s and only as recently as 1971 was it anchored in the curriculum of Austrian universities as a separate field of study With the present book in English the editors hope to stimulate the interest of international social scientists in Austria to overcome language barriers and to make the topical problems and developments of Austrian democracy accessible to an international reading public The book is intended to reflect the current state of a discipline political science However it is also to be a contribution to the further development of this discipline It should stimulate further intensive and critical occupation with the theme parties and the party system in Austria

*'Accreditation' Model* John Pratt,2004-01-01 In 1993 the Austrian government introduced legislation to create a new Fachhochschul sector of vocationally oriented higher education This established a new kind of body the Fachhochschulrat to accredit courses and eventually to designate institutions The Fachhochschul policy appears against many predictions at the time to have been highly successful The introduction of this accreditation model was remarkable in that it drew on experience of the Council for National Academic Awards and polytechnic policy in the United Kingdom a country with a very different tradition in higher education and with a different political and constitutional context The model was a radical departure from the Austrian tradition of central political control and was controversially favoured over more obvious alternatives This book reports on research funded by the UK Economic and Social Research Council into this new approach to policy and control in higher education in Austria It offers an unusual opportunity to explore this policy transfer and to compare the use of similar institutional mechanisms in different contexts It assesses the factors that led to the acceptance and success of the policy and its impact on the higher education system more widely

*Commentaries on Selected Model Investment Treaties* Chester Brown,2013-01-17 The existing literature on the substantive and procedural aspects of bilateral investment treaties BITs relies heavily on investment treaty arbitration decisions as a source of law What is missing is a comprehensive analytical review of state practice This volume fills this gap providing detailed analyses of the investment treaty policy and practice of nineteen leading capital exporting states and emerging market economies The authors are leading experts in government academia and private legal practice and their chapters are largely based on primary source materials Each chapter provides a description of the regulatory or policy framework governing foreign investment both inflows and outflows with a historical presentation of the state s Model BIT an examination of internal government processes and practices relating to treaty negotiation conclusion ratification and record keeping and a detailed article by article analytical commentary of the state s Model BIT elucidating the policy behind each provision and highlighting the ways in which the actual investment treaty practice of that state deviates from this standard text This commentary is supplemented

by the case law relevant to that state's investment treaties. This commentary will be of immense assistance to counsel and arbitrators engaged in arguing and determining the proper interpretation of BITs and investment chapters in Free Trade Agreements and to government officials and scholars engaged in BIT policy formulation and implementation. It will serve as a standard resource for legal practitioners, scholars, policy makers and other stakeholders in the field of international investment policy law and arbitration.

*The Right to Regulate in International Investment Law* Catharine Titi, 2014-12-01

Since the inception of the international investment law system investment promotion and protection have been the *raison d'être* of investment treaties and states have confined their policy space in order to attract foreign investment and protect their investors abroad. Languishing in relative obscurity until recently the right to regulate has gradually come to the spotlight as a key component of negotiations on new generation investment agreements around the globe. States and regional organisations including notably the European Union and the United States have started to examine ways in which to safeguard their regulatory power and guide and delimit the interpretive power of arbitral tribunals by reserving their right to pursue specific public policy objectives. The monograph explores the status quo of the right to regulate in order to offer an appraisal and a reference tool for treatymakers thus contributing to a better understanding of the concept and the broader discourse on how to enhance the investment law system's legitimacy.
