The Publishers Weekly, 1977 **The Blacksmith's Source Book** James Evans Fleming, 1980 This unique annotated bibliography lists nearly 300 books on the art of blacksmithing. It is divided into four parts: Practical Blacksmithing, Specialized Areas of Blacksmithing, Historical Background of the Profession, and Products of the Forge. Part 1 deals with the technical side of blacksmithing, the texts, manuals, and courses aimed at teaching the basic processes. It includes reference books on the materials of blacksmithing and on metallurgy. Part 2 presents the more specialized and advanced processes of blacksmithing, including ornamental ironwork, farm smithing, industrial forging, and bladesmithing. It also includes materials related to pattern-welded Damascus steel. The listings in part 3 deal with blacksmithing as a literary and historical subject. The primary focus of these books is on the traditions, lore, and descriptions of the trade. In these books, the processes, tools, and products are of only secondary importance. Part 4 lists books that treat the products of the forge, a wide-ranging area that covers everything from tools and utensils to architectural works. A special feature of this section is a chapter emphasizing individual smiths and their works. The book also contains two indexes: one an alphabetical listing by author and one an alphabetical listing by title. *Index to Handicraft Books, 1974-1984* Carnegie Library of Pittsburgh, Science and Technology Department, 1986 Handicrafts and do-it-yourself projects have always been a library's most popular and heavily requested subject. And for more than a decade, a definitive index to handicraft books has not been published. To fill this gap

the Science and Technology Department at Carnegie Library of Pittsburgh has compiled the Index to Handicraft Books listing more than 900 books and over 12,400 subject entries covering books published from 1974 to 1984. The Index to Handicraft Books is an essential reference tool for librarians who want to help someone find instructions for a varied range of do-it-yourself projects providing quick access to craft projects in books more recent than previous handicraft index books have listed. Each entry in the index consists of a subject heading, the name of the project as listed in the book, the author and title of the book and the page numbers on which the project can be found. The author and title correspond to those in the List of Works Cited section which gives full bibliographic information in order to help librarians find the book on their shelves or obtain the book through interlibrary loan. Because this index developed from a card file index of craft books acquired by Carnegie Library since 1974, the list concentrates mainly on medium priced books that most libraries buy.

There is also coverage of related issues historical background on the product, raw materials used by products generated during manufacture, quality control procedures, future applications and sources for more information.
