question both violent geographies and the geographies of violence. With a focus on direct violence this book situates violent acts within the context of broader political and structural conditions. Violence it is argued is both a social and spatial practice. Adopting a geographic perspective Space Place and Violence provides a critical reading of how violence takes place and also produces place. Specifically four spatial vignettes home school streets and community are introduced designed so that students may think critically how race sex gender and class inform violent geographies and geographies of violence.
