Essential Genetics Daniel L. Hartl, Elizabeth W. Jones, 2002 bull Genetics bull Principles of Genetics bull Introduction to Genetics

The Genes That Make Us Edwin Kirk, 2020-09-01 Genes we all have them and we're all affected by them often in unknown ways Whether directly inherited or modified by our environment genes control or significantly influence almost every aspect of our lives From the success of our conception and the development of our sexual characteristics to the colour of our skin hair and eyes From our height and weight to our daily health And unfortunately our genes are involved in an untold number of diseases For many the first time that genetics truly matters is in a doctor's office as they learn about a condition that may affect them their unborn children or even their wider family Yet from the first laborious survey of the human genome twenty years ago to the commercial machines that now sequence 6 000 genomes per year a revolution is taking place in medicine Genetic screening is already available for major diseases and will become an increasingly prevalent medical tool Around the world teams of researchers are working on cures for diseases such as cancer certain degenerative disorders and a host of syndromes while others are inventing new ways to conceive and even modifying our genome in ways that could change what it means to be human Navigating this world of heartbreaking uncertainties tantalising possibilities and thorny questions of morality is Professor Edwin Kirk who in addition to having over two decades of experience is that rare doctor who works both in the lab and with patients In The Genes That Make Us he explains everything you need to know with humour insight and great humanity
