**Essays on Astronomical History and Heritage** Steven Gullberg, Peter Robertson, 2023-08-14 This multidisciplinary work celebrates Wayne Orchiston's career and accomplishments in historical and cultural astronomy on the occasion of his 80th birthday. Over thirty of the world's leading scholars in astronomy, astrophysics, astronomical history, and cultural astronomy have come together to honor Wayne across a wide range of research topics. These themes include Astronomy and Society, Emergence of Astrophysics, History of Radio Astronomy, Solar System Observatories, and Instrumentation, Ethnoastronomy, and Archaeoastronomy. This exceptional collection of essays presents an overview of Wayne's prolific contributions to the field, along with detailed accounts of the book's diverse themes. It is a valuable and insightful volume for both researchers and others interested in the fields of historical astronomy and cultural astronomy.

*The History of Radio Astronomy* Sarah Stevens-Rayburn, 1983      **Golden Years of Australian Radio Astronomy** Wayne Orchiston, Peter Robertson, Woodruff T. Sullivan III, 2022-01-20 The evolution of Australian radio astronomy from 1945 to 1960 has been studied in detail by numerous historians of science in recent years. This Open Access book is the first to present an overview of this remarkable chapter in Australian science. The book begins in the post-war period as the Radiophysics Laboratory in Sydney switched from secret wartime research on radar to peacetime applications of this new technology. Next follows the detection of radio waves from space and the ensuing transformation of this fledgling science into the dominant research program at the Radiophysics Lab. Drawing from this history, the book shows how by 1960 the Radiophysics Lab had become the largest and most successful radio astronomy group in the world. The final chapter presents an overview of Australian radio astronomy from 1960 to the present day as Australia prepares to co-host the multi-national multi-billion dollar Square Kilometre Array. Nearly 300 high-quality images complement the text, drawn from a wide range of sources, including the extensive collection held by the CSIRO Radio Astronomy Image Archive. The book will be an essential reference for readers interested in the scientific and cultural development of radio astronomy. This book is published open access under a CC BY 4.0 license.

[The Rise of Radio Astronomy in the Netherlands](#) Astrid Elbers, 2016-11-23 Radio astronomy was born during the Second World War, but as this book explains, the history of early Dutch radio astronomy is in several respects rather anomalous in comparison to the development of radio astronomy in other countries. The author describes how these very differences led the Netherlands to become one of the world leaders in radio astronomy. Dominated by the Leiden astronomer Jan Hendrik Oort, the field embarked on an era of success, and to this day the country still holds a leading position. To tell this story, the book focuses on three key events in the period 1940-1970: namely, the construction of the radio telescopes in Kootwijk (1948), in Dwingelo (1956), and in Westerbork (1970). These projects show that Dutch radio astronomers must not be

seen as merely scientists but also as strategic lobbyists networkers and organizers in a specific political and economic context It was in the process of planning designing and constructing these instruments that the interests of the astronomers industrial partners politicians and lobby groups merged to create today s existing research centers for radio astronomy
