The Halo Solution Richard Neebel,1979 *Parallel Computational Fluid Dynamics '96* P. Schiano,N. Satofuka,A. Ecer,Jacques Periaux,1996-12-09 In the last decade parallel computing has been put forward as the only computational answer to the increasing computational needs arising from very large and complex fluid dynamic problems Considerable efforts are being made to use parallel computers efficiently to solve several fluid dynamic problems originating in aerospace climate modelling and environmental applications Parallel CFD Conferences are international and aim to increase discussion among researchers worldwide Topics covered in this particular book include typical CFD areas such as turbulence Navier Stokes and Euler solvers reactive flows with a good balance between both university and industrial applications In addition other applications making extensive use of CFD such as climate modelling and environmental applications are also included Anyone involved in the challenging field of Parallel Computational Fluid Dynamics will find this volume useful in their daily work
