Data Structures and the Standard Template Library

William Joseph Collins,2003 DATA STRUCTURES AND THE STANDARD TEMPLATE LIBRARY by William Collins teaches the fundamentals of Data Structures and their implementations It uses C as the language of instruction Most of the data structures are provided in the Standard Template Library STL which students will be able to use in their further coursework and beyond To further students understanding of implementation issues alternative implementation other than the STL are also discussed Hands on learning is promoted throughout the text by the use of Programming Projects and labs Programming projects at the end of each chapter allow students to develop and implement their own data structures or to extend or apply data structures introduced in the chapter Additionally optional labs accompany the text and allow students to practice by giving them opportunities to code These labs can be used in many different ways such as in a closed lab in an open lab or for optional homework assignments Publisher description

Object-oriented Design in C++ Using the Standard Template Library Nicholas J. DeLillo,2002 The primary focus of Nick DeLilloAEs new book is on object oriented design OOD using the Standard Template Library STL The STL provides reusable reliable components for software design so students donAEt have to be concerned with the correctness and efficiency of the code they design The author assumes students have prior

knowledge of data structures and algorithms then builds upon this knowledge by introducing the use of the STL Chapters 1 4 serve as a review of Data Structures and Algorithms including such topics as encapsulation inheritance polymorphism and

traditional data structures In Chapter 5 the transition is made to using the STL to accomplish these same tasks enabling students to see the benefit of using these predefined tools The students also are introduced to OOD projects and how the STL is a powerful tool for this type of work While several texts may cover pieces of these topics this is the first text that covers them in one comprehensive book **Developments in Engineering Computational Technology** B. H. V. Topping,2000

Contains a selection of papers that were presented at The Fifth International Conference on Computational Structures Technology and The Second International Conference on Engineering Computational Technology which were held in Leuven Belgium from 6 8 September 2000
