Stocks Bonds And Gold:

The Commercial & Financial Chronicle, Bankers' Gazette, Commercial Times, Railway Monitor, and Insurance Journal, 1870 **Is Gold a Hedge or a Safe Haven? an Analysis of Stocks, Bonds and Gold** Dirk G. Baur, 2015 Is gold a hedge against sudden changes in stock and bond returns or does it instead have a subtly different property that of being a safe haven This paper addresses these two interlinked questions A safe haven is defined as a security that is uncorrelated with stocks and bonds in case of a market crash This is counterpoised against a hedge defined as a security that is uncorrelated with stocks or bonds on average We study constant and time varying relationships between stocks bonds and gold in order to investigate the existence of a hedge and a safe haven The empirical analysis examines US UK and German stock and bond returns and their relationship with gold returns We find that gold is a hedge against stocks on average and a safe haven in extreme stock market conditions This finding suggests that the existence of a safe haven enhances the stability and resiliency of financial markets since it reduces investors losses at times when a reduction is needed the most A portfolio analysis further shows that the safe haven property is extremely short lived so that an investor buying gold one day after a shock loses money **The Commercial & Financial Chronicle and Hunt's Merchants' Magazine**, 1871 **The Commercial**

& Financial Chronicle and Hunt's Merchant's Magazine, 1871 Spillover Effects Among Gold, Stocks, and Bonds Steven Sumner, Robert Johnson, Luc Soenen, 2012 In this paper an attempt is made to document the interdependence among stocks bonds and gold Gold is an important asset class and has often been seen as a safe haven and counter cyclical investment vehicle We present an extension of the work done by Diebold and Yilmaz 2009 using a spillover index methodology to examine whether gold returns and volatilities can predict U S stock and bond market movements or vice versa For the sample period from January 1970 until April 2009 return spillovers appear muted However there is some evidence of volatility spillovers of which much is attributable to a spillover from innovations in stocks to bond return volatility Spillovers in terms of returns are higher during the early 1980s mid 1990s and the most recent financial crisis Volatility spillovers have been very elevated in the recent financial crisis as well as late 1970s and early 1990s The lack of any substantial relationship between gold and stocks and gold and bonds raises the question whether gold price movements can be used as a predictor for stocks and bond prices Gold Versus Stocks, Bonds and Money Markets in Six Countries, 1982
