midsummer sunrise is well known the alignment and the viewing position are critically different from popular belief And until now the existence of an earlier alignment to the moon and a later one to the midwinter sunset has been little appreciated One almost unexplained puzzle remains The site of Stonehenge lies at the heart of a vast six mile wide graveyard All around it are groups of earthen long barrows the burial places of Neolithic people many of whom died more than a thousand years before Stonehenge The mystery is that before Stonehenge there was a vacuum two miles across inside that cemetery Nothing was inside Why Burl points to an answer **Fences, Gates and Bridges** George A.
