## **Stories For Generations One:**

**The Story of Sexual Identity** Phillip L. Hammack, Bertram J. Cohler, 2009-03-06 This book assembles a diverse group of scholars working within a new pathbreaking paradigm of sexual science fusing perspectives from history sociology and psychology. The contributors are united in their commitment to the idea of narrative as central to the study of sexual identity offering an analytic approach to social science inquiry on sexual identity that restores the voices of sexual subjects. The result is a rich examination of lives in context with an eye toward multiplicity and meaning across the life course. Central to the chapters in this volume is the significance of history generation and narrative in the provision of a workable and meaningful configuration of identity.

**Multi-Agent Systems and Applications** Michael Luck, 2001-06-20 This book presents selected tutorial lectures given at the summer school on Multi Agent Systems and Their Applications held in Prague Czech Republic in July 2001 under the sponsorship of ECCAI and Agent Link. The 20 lectures by leading researchers in the field presented in the book give a competent state of the art account of research and development in the field of multi agent systems and advanced applications. The book offers parts on foundations of MAS social behaviour meta reasoning and learning and applications.

**Artificial Intelligence and Literary Creativity** Selmer Bringsjord, David Ferrucci, 1999-09-01 Is human creativity a wall that AI can never scale? Many people are happy to admit that experts in many domains can be matched by either knowledge based or sub symbolic systems but even some AI researchers harbor the hope that when it comes to feats of sheer brilliance mind over machine is an unalterable fact. In this book the authors push AI toward a time when machines can autonomously write not just humdrum stories of the sort seen for years in AI but first rate fiction thought to be the province of human genius. It reports on five years of effort devoted to building a story generator the BRUTUS 1 system. This book was written for three general reasons. The first theoretical reason for investing time money and talent in the quest for a truly creative machine is to work toward an answer to the question of whether we ourselves are machines. The second theoretical reason is to silence those who believe that logic is forever closed off from the emotional world of creativity. The practical rationale for this endeavor and the third reason is that machines able to work alongside humans in arenas calling for creativity will have incalculable worth.
