Stress Crowding And Blood Pressure In Prison:

Stress, Crowding, and Blood Pressure in Prison Adrian M. Ostfeld,Stanislav V. Kasl,David A. D'Atri,Edward F. Fitzgerald,2023-10-25 Originally published in 1987 the purpose of Stress Crowding and Blood Pressure in Prison was to present in a single location the rationale background methods principal results analyses interpretations and conclusions of the authors studies at Massachusetts correctional institutions Employing a longitudinal method for studying 568 inmates the authors drew on psychological social and health sciences assessments to identify the effects of housing mode prison employment leisure activities disciplinary actions and personal and sociodemographic characteristics to identify what was particularly stressful for inmates A parallel study of prison staff and a specific series of conclusions and recommendations concludes the book The Environmental Psychology of Prisons and Jails Richard E. Wener,2012-06-18 This book distills thirty years of research on the impacts of jail and prison environments The research program began with evaluations of new jails that were created by the US Bureau of Prisons which had a novel design intended to provide a non traditional and safe environment for pre trial inmates and documented the stunning success of these jails in reducing tension and violence This book uses assessments of this new model as a basis for considering the nature of environment and behavior in correctional settings and more broadly in all human settings It provides a critical review of research on jail environments and of specific issues critical to the way they are experienced and places them in historical and theoretical context It presents a contextual model for the way environment influences the chance of violence The Oxford Handbook of Sentencing and Corrections Joan Petersilia,Kevin R. Reitz,2015 This handbook surveys American sentencing and corrections from global and historical views from theoretical and policy perspectives and with attention to a number of problem specific issues **Prisons Crowding: A Psychological Perspective** Paul Paulus,2012-12-06 This volume is a summary of a 15 year effort to determine the effects of prison crowding and their relationship to the broader realm of crowding phenomena and theories Although the writing of this volume was for the most part a solitary effort the data and ideas it is based on were mostly the result of a collaborative effort with Verne Cox and Garvin McCain Their schedules limited their ability to contribute to this volume but they provided much constructive feedback and assistance Cox also wrote a preliminary draft of Chapter 3 and both McCain and Cox made major contributions to Chapter 5 and assisted with several other chapters I am greatly indebted to these two fine scholars for their efforts and support over the course of our joint research endeavors In recognition of this fact the pronoun we is used throughout this volume This research would not have been possible without the cooperation and support of thousands of inmates and hundreds of prison officials The unconditional support throughout the project from Director Norman Carlson and former regional research director Jerome Mabli both of the Federal Bureau of Prisons is also greatly appreciated Thanks are due to the National Institute of Justice for financial support during various phases of this project The support of John Spevacek of the Institute was indispensable Funds were also provided by the Hogg Foundation U S
