Stop It Project Failures:

Stop IT Project Failures Dan Remenyi, 2010-02-17 This book is about information systems development failures and how to avoid them. It considers what goes wrong with information systems development projects and what actions may be taken to avoid potential difficulties. The reduction of the impact or even the elimination of the problems is discussed in terms of an information systems risk management programme. Stop IT Project failure helps to ensure that IS project managers are successful in helping to deliver application systems. However IS development risk can never be entirely eliminated and consequently the practitioner needs to bear in mind that an IS development project is never without risk and hence there is a continuing potential for something to go wrong. The book covers the key issues and variables and makes specific practical suggestions about the good management practice that is required to implement IS project risk processes. Dr Dan Remenyi has spent more than 25 years working in the field of corporate computers and information systems. He has worked with computers as an IS professional, business consultant and user. In all these capacities he has been primarily concerned with benefit realisation and obtaining the maximum value for money from the organisation's information systems investment and effort. He has worked extensively in the field of information systems project management, specialising in the area of project risk identification and management. He has written a number of books and papers in the field of IT management and regularly conducts courses and seminars as well as working as a consultant in this area. Dr Dan Remenyi holds a B Soc Sc, an MBA and a PhD. He is a Visiting Professor at Chalmers University of Technology in Gothenberg, Sweden, and an associate member of faculty at Henley Management College in the United Kingdom.

Kusek, Marelize Goergens Prestidge, Billy C. Hamilton, 2013-05-01 There are five critical rules to keep in mind in development projects to avoid implementation failure. If you do not know where you are going, ask the right questions. Keep your champions close but your naysayers closer. Know that informal networks matter. Find and remove bottlenecks. Build the ship as it sails.
