## **Stopping Place:**

**Stopping Places** Simon Evans,2004 This title tells the story of the lives of the Gypsies who worked in Kent which served as the market garden for London Families of Gypsies would return again and again to the same encampments to train and pick hops pick fruit and gather peas beans and other crops    The Stopping Places Damian Le Bas,2018-06-07 I needed to get to the stopping places so I needed to get on the road It was the road where I might at last find out where I belonged Damian Le Bas grew up surrounded by Gypsy history His great grandmother would tell him stories of her childhood in the ancient Romani language the places they worked the ways they lived the superstitions and lores of their people In a bid to better understand his heritage Damian sets out on a journey to discover the stopping places the old encampment sites known only to Travellers Through winter frosts and summer dawns from horse fairs to Gypsy churches Damian lives on the road somewhere between the romanticised Gypsies of old and their much maligned descendants of today A beautiful writer who seems born to tell this fascinating story Amy Liptrot Winner of the Somerset Maugham Award Shortlisted for the Edward Stanford Travel Writing Award Longlisted for the Wainwright Prize    Moving Pictures/Stopping Places David B.

Clarke,Valerie Crawford Pfannhauser,Marcus A. Doel,2009-05-16 Mobility has long been a defining feature of modern societies yet remarkably little attention has been paid to the various stopping places \_hotels motels and the like\_ that this mobility presupposes If the paradoxical qualities of fixed places dedicated to facilitating movement have been overlooked by a variety of commentators film makers have shown remarkable prescience and consistency in engaging with these still points around which the world is made to turn Hotels and motels play a central role in a multitude of films ranging across an immensely wide variety of genres eras and national cinemas Whereas previous film theorists have focused on the movement implied by road movies and similar genres the outstanding contributions to this volume extend the recent engagement with space and place in film studies providing a series of fascinating explorations of the cultural significance of stopping places both on screen and off Ranging from the mythical elegance of the Grand Hotel through the uncanny spaces of the Bates motel to Korean love motels the wealth of insights from a variety of theoretical perspectives that this volume delivers is set to change our understanding of the role played by stopping places in an increasingly fluid world    *Aviation in Crisis*

Ruwantissa Abeyratne,2017-11-22 This title was first published in 2003 The events of 11 September 2001 defy modern economic theory when addressed in aviation terms Economic theory would suggest that once the impact of such events are a thing of the past and economies are restored to their status quo ante a rise in the gross domestic product of States to earlier levels would almost inevitably result in increased consumption This in turn would mean that the demand for air travel would rise to earlier proportions and consumption in terms of air transport services would be restored to normalcy However the September attacks on United States property introduced a unique characteristic through the fear factor that directly impacts the future development of air transport As a result the grim task of restoration of passenger confidence stands in the way of

economic revival of the air transport industry Aviation was always in crisis The air transport industry even prior to 11 September 2001 although seemingly a glamorous exciting and prosperous business never enjoyed sustained periods of profitability Even among the large carriers a short bout of profitability would inevitably be followed by a period of downturn in real income It is simply that this fluctuation in fortune is an ineluctable characteristic of air transport whose fortunes are dictated by rigid regulation competition and technological change If a sustained analysis were to be made of air transport plain economic theory would no longer be the exclusive discipline for consideration Rather all relevant factors have to be taken in context and emerging issues should be analyzed as possible threats to the economic well being of the air transport industry This book addresses issues in a post September 2001 context but also analyses issues past and present with the intent of looking at the future Four major areas are taken into consideration which were in crisis but are truly impacted by the events of September 2001 These areas relate to crises in the commercial security insurance and environmental protection fields Of these the first and fourth areas are inextricably intertwined as aircraft noise regulations in various States have a direct impact on aircraft financing which in turn is linked to demand for air services A drop in demand for air services would essentially mean that the demand for lease or purchase of new aircraft would drop When this occurs air transport enterprises would be more inclined to cut costs and therefore concentrate on using the aircraft already at hand upgrading them to conform to the The purpose of this book is to view the overall picture of an aviation industry comprising air transport and other aviation related industries in crisis through issues that continue to impact the economic viability of air transport particularly as a result of the events of 11 September 2001
