Preaching from Inside the Story Jeffrey W. Frymire, 2022-06-02

Preaching from Inside the Story is a book that seeks to carve out an understanding of narrative preaching in an age where there is little agreement about its nature and practice Capitalizing on the works of Craddock and Lowry it seeks to find an expanded palette upon which the preacher may engage the larger canvas of narrative preaching This book will engage the mind by introducing neuroscientific understandings of creativity build upon the foundations of the philosophy of stories by

engaging Aristotle's foundational understanding of narrative and renew the Lowry Loop by expanding this seminal work and how it should be understood in our current culture. Preaching from Inside the Story breaks new ground by encouraging preachers to move inside stories and tell them from the inside out providing a positive effect thereby affording non narrative preachers to connect with storytelling principles. Ultimately it is filled with examples of how to do narrative in a very practical way. However in showing these practical examples the reader is involved in a deep analysis of those narrative sermons and how they fit into an overall narrative understanding of preaching. In the final analysis it invites the reader to take a fresh journey into narrative preaching.

Theory and Practice of Psychiatry Bruce J. Cohen, 2003-02-06 Based on years of teaching psychiatry to medical students and residents this single authored textbook offers a conversational yet detailed guide to modern psychiatric theory and practice. Exploring various approaches to psychiatric disorders including neurobiology, dimensional personality assessment, behavioral science and psychodynamic and cognitive theories it lucidly illustrates each approach's strengths and weaknesses and suggests how clinicians can interweave them in working with patients. Using clinical vignettes and recent research findings to illustrate the connections between phenomenology, pathophysiology and treatment it covers all of the major psychiatric disorders and includes tables listing their DSM IV TR diagnostic criteria. The book offers balanced coverage of subjects that receive scant attention in other introductory textbooks including the limitations of the DSM IV categorical approach to psychiatric diagnosis, controversies surrounding the dissociative disorders and recovered memories and the prescription of stimulant medications to children with suspected attention deficit hyperactivity disorder. Later chapters provide practical guidelines for estimating a patient's risk of suicide and violence and for assessing competence to consent to medical or psychiatric treatment. In eschewing a dry recitation of clinical syndromes for an engaging discussion aimed at teaching the reader how to think psychiatrically the book will appeal to medical students, psychiatric residents, mental health clinicians and primary care physicians.
