Terrorism and Adversity raises key issues facing international business and management in an era of global uncertainty. Gabriele Suder's second edited book about the security business nexus analyses and evaluates the main strategic and operational responses to global commerce and management. The contributors explore the complexities and linkages of firms, industries, organizational structures, international relations, markets, and terrorism networks. They investigate these networks and offer insight into the strategic behavior of international firms. The authors likewise examine corporate management and performance issues that encompass internationalization and location decisions, global supply chain management, and brand portfolio challenges. The book concludes by outlining future challenges and with a discussion of the crucial issues that remain open and that will be shaped by the geopolitical context and the way business adapts its corporate strategies. Designed to offer key tools for risk assessment and management in this field, this important book will be invaluable to risk strategists, CEOs of international firms, credit risk analysts, and academics with an interest in international business and/or risk management.

**Development** Anjana Banerjee, 2007. The book is a critical examination of life and philosophy of Foucault, who is mostly remembered for his theory of power and his analysis of disciplinary society. It covers genealogical histories of the human sciences, madness, the penal system, bio-politics, and sexuality, and methodical reflections on structuralism, archaeology, heterotopia. Foucault identifies three axes as being constitutive of subject knowledge: power, ethics, and places. A special emphasis is on the institutional expression of knowledge production.

**Terrorism Financing Risks in Botswana** Jackson Madzima, 2009. This paper is a contribution to the debate on the risks of money laundering and the financing of terrorism in Botswana. It provides an overview of Botswana's Anti Money Laundering and Counter Financing of Terrorism (AML/CFT) regimes. An analytical framework woven around the three pillars of prevention, enforcement, and international co-operation is used in this discussion. As a benchmark for the discussion, the paper outlines the international regulatory regimes for curbing both money laundering and the financing of terrorism. The paper is premised on the assumption that both money laundering and the financing of terrorism have similar characteristics and can thus be analysed within the same framework. A number of risks are highlighted within the prevailing economic and political context in Botswana. While recognising an increasingly improving AML/CFT legal framework, it is noted that in the absence of a risk-based approach to these issues, the realisation of international standards will remain a challenge.
