Gutiérrez,2020-08-25 Reactive and functional polymers are manufactured with the aim of improving the performance of unmodified polymers or providing functionality for different applications These polymers are created mainly through chemical reactions but there are other important modifications that can be carried out by physical alterations in order to obtain reactive and functional polymers This volume presents a comprehensive analysis of these reactive and functional polymers Reactive and Functional Polymers Volume One provides the principles and foundations for the design development manufacture and processing of reactive and functional polymers based primarily on biopolymers polyesters and polyurethanes The text provides an in depth review of updated sources on reactive resins and silicones In this book world renowned researchers have participated including Dr Runcang Sun Associate editor for the journal Carbohydrate Polymers With its comprehensive scope and up to date coverage of issues and trends in Reactive and Functional Polymers this is an outstanding book for students professors researchers and industrialists working in the field of polymers and plastic materials

**Textbook of Polymer Science** Fred W. Billmeyer,1984-03-21 This Third Edition of the classic best selling polymer science textbook surveys theory and practice of all major phases of polymer science engineering and technology including polymerization solution theory fractionation and molecular weight measurement solid state properties structure property relationships and the preparation fabrication and properties of commercially important plastics fibers and elastomers

Aging of Industrial Polymers, Volume 1 Emmanuel Richaud,2025-10-24 Polymers and composites are omnipresent in our daily lives enabling the lightening of structural materials and food packaging Their performance not only depends on their chemical structure synthesis architecture and forming process but also evolves over time under the effect of processes that modify sometimes slowly but irreversibly the structure of the material As a result users need to consider the maximum duration of use during which these materials will retain acceptable levels of properties This questioning is even more crucial as it responds to societal requirements linked to limiting end of life waste flows and preserving the resources necessary for their production
