Lehmann,1991-06-27 **Asymptotic Theory of Testing Statistical Hypotheses** Vladimir E. Bening,2011-08-30 The series is devoted to the publication of high level monographs and surveys which cover the whole spectrum of probability and statistics The books of the series are addressed to both experts and advanced students **Testing Statistical Hypotheses with Given Reliability** Kartlos Joseph Kachiashvili,2023-06-02 This book is dedicated to the branch of statistical science which pertains to the theory of hypothesis testing This involves deciding on the plausibility of two or more hypothetical models based on some data This work will be both interesting and useful for professional and beginner researchers and practitioners of many fields who are interested in the theoretical and practical issues of the direction of mathematical statistics namely in statistical hypothesis testing It will also be very useful for specialists of different fields for solving suitable problems at the appropriate level as the book discusses in detail many important practical problems and provides detailed algorithms for their solutions Sequential Tests of Statistical Hypotheses Bhaskar Kumar Ghosh,1970 The purpose of this book is to give a systematic account of the mathematical theory in this field as applied to problems of hypothesis testing The resulting methods are predominantly sequential probability ratio tests A brief account of classical tests under the neyman pearson formulation is included The notion of sequential analysis has been used in some form or other in various branches of statistical inference We may classify these branches into three broad categories Statistical tests of hypotheses statistical estimation and statistical decision theory *An Essay on the Theory of Testing Statistical Hypotheses* Norman Morse,1953 **Testing Statistical Hypotheses. Lehmann** Erich Leo Lehmann,1959 **Asymptotic Theory of Testing Statistical Hypotheses** Vladimir E. Bening,2000-01-01 The series is devoted to the publication of high level monographs and surveys which cover the whole spectrum of probability and statistics The books of the series are addressed to both experts and advanced students **Testing Statistical Hypotheses** Howard Francis Taylor,1959 *Testing statistical hypotheses using parametric tests* Stonia Thorand,2022-06-27 Seminar paper from the year 2022 in the subject Mathematics Statistics grade 1 3 language English abstract The pandemic has spread during the last two years dramatically In Germany alone roughly 25 66 million confirmed cases and 137 348 confirmed Corona deaths were documented Interestingly the highest number of confirmed cases was around 1 6 million on the 21st March of 2022 while the confirmed death counts were at 1 520 in Germany at the same day Conversely this means that the counted deaths are roughly 1 000 times lower than the infection levels while the highest death count was detected at the 14th of December in 2020 with a value of 6 410 with roughly 170 00 confirmed cases Meaning that around 27 times less deaths were confirmed in comparison to infection cases The decrease of Corona deaths may be caused by the introduction of the Corona vaccinations With the help of the accumulated data during the pandemic the effect of the vaccination can be tested against the hospitalization values of Corona patients with statistical tests Robert Koch Institut 2022 The test does indirectly adress

the issue towards the decreasing Corona deaths with increasing infection cases The increasing value of confirmed cases clearly shows that the vaccination does not inhibit the infection but somehow may have an weakening effect on the course of the disease The approach mainly focus on different vaccination status and age groups of hospitalized Corona patients in Germany Not included are factors like the Corona variation and the specific vaccines Statistical tests to address such questions are parametric tests which are powerful tools to evaluate data following a normal distribution Within the assignment two parametric tests are presented pearson correlation coefficient and one way ANOVA while the one way ANOVA was chosen to adress the question of interest desribed above The results of the analysis indicate significant differences between hopsitalized Corona patients with different vaccination status which is discussed in detail in the conclusion
