**The March of Philosophy** Henry Alpern, 1933      **The March of Philosophy** Hymen Alpern, 1968      **Philosophy of Nonviolence** Chibli Mallat, 2015-01-08

In 2011 the Middle East saw more people peacefully protesting long entrenched dictatorships than at any time in its history. The dictators of Tunisia, Egypt and Yemen were deposed in a matter of weeks by nonviolent marches. Imprecisely described as the Arab Spring, the revolution has been convulsing the whole region ever since. Beyond an uneven course in different countries, *Philosophy of Nonviolence* examines how 2011 may have ushered in a fundamental break in world history. The break, the book argues, is animated by nonviolence as the new spirit of the philosophy of history. *Philosophy of Nonviolence* maps out a system articulating nonviolence in the revolution, the rule of constitutional law it yearns for, and the demand for accountability that inspired the revolution in the first place. Part One, *Revolution*, provides modern context to the generational revolt, probes the depth of Middle Eastern Islamic humanism, and addresses the paradox posed by nonviolence to the perpetual peace ideal. Part Two, *Constitutionalism*, explores the reconfiguration of legal norms and power structures, mechanisms of institutional change, and constitution making processes in pursuit of the nonviolent anima. Part Three, *Justice*, covers the broadening concept of dictatorship as crime against humanity, an essential part of the philosophy of nonviolence. It follows its frustrated emergence in the French revolution, its development in the Middle East since 1860, through the trials of Arab dictators, the pyramid of accountability post dictatorship, and the scope of foreign intervention in nonviolent revolutions. Throughout the text, Professor Mallat maintains thoroughly abstract and philosophical arguments while substantiating those arguments in historical context, enriched by a close participation in the ongoing Middle East revolution.

*Philosophy in Process* Paul Weiss, 1989-02-01      *The Oxford Handbook of British Philosophy in the Nineteenth Century* W. J. Mander, 2014-02-06

This volume contains thirty new essays by leading experts on British philosophy in the nineteenth century and provides a comprehensive and unrivalled resource for advanced students and scholars. As well as the most celebrated figures such as Mill, Spencer, Sidgwick and Bradley, the Handbook discusses many other, less well known names and debates from the period such as Whewell, Shadworth Hodgson and Martineau. The Handbook contains six parts. Part I examines logic and scientific method from Whately through to the advent of modern formal logic. Part II discusses some of the century's most famous metaphysical systems such as those of the Scottish Common Sense school, J. F. Ferrier and F. H. Bradley. Part III covers science and philosophy, paying particular attention to positivism and the impact of Darwin's evolutionary theory. Part IV explores ethical, social and political thought, including the lesser known themes of feminism and British Socialism. Part V concerns religious philosophy, and Part VI examines the changes which took place in the practice of philosophy itself during the nineteenth century. Prefaced by an introductory article which contextualises and relates the various themes and controversies of the century, each chapter provides an overview of the topic under consideration and surveys the state of current research, while at the same time offering new ideas and
