The Immorality Of Limiting Growth:

The Immorality of Limiting Growth Edward Walter, 1981-01-01 The Industrial Age has ended according to no growth futurism because the finitude of the earth has been reached Its proponents maintain that technological innovation cannot save industrial society because of pollution over population and inflation They call for a transformed society in which productivity pollution and population growth are strictly controlled This volume emphatically challenges the no growth viewpoint on both philosophical and empirical grounds In it Edward Walter demonstrates that the interests of those who are socially deprived cannot be fulfilled in a steady state because the privileged classes are able to use their power to prevent redistribution of wealth and to retain their advantages Far from equating technology with pollution and the depletion of natural resources Walter sees it as the means by which resource shortages can be overcome and pollution control can be achieved He describes and recommends an essential liberalism that could provide economic development to all classes in a spirit of international cooperation without necessitating the transformation of human nature and political institutions

Anthropology and Contemporary Human Problems John H. Bodley, 2012-04-12 We live in a time of global mega problems of unsustainable growth and consumption resource depletion ecosystem degradation global warming escalating energy costs poverty and conflict Cultural anthropologist John H Bodley trenchantly critiques these most pressing issues and shows how anthropology makes it possible to find solutions The focus on culture scale suggests that many solutions may be found by developing local communities supported by regional markets and ecosystems rather than by making the continuous accumulation of financial capital the dominant cultural process throughout the world Now in its sixth edition this classic textbook continues to have tremendous relevance and is more timely than ever in light of the recent global economic crisis It exposes readers to the problems of a world out of balance with misdirected growth by the elite Bodley offers examples from prehistoric and modern tribal societies along side of ancient imperial and contemporary commercial societies Students will find this to be the trusted source to build a world view Anthropology and Contemporary Human Problems is ideal for adoption in anthropology and sociology courses on globalization cultural ecology social class and inequality the environment sustainability and development

Explorations in Environmental Political Theory Joel Jay Kassiola, 2015-03-04 The contributors to this volume focus on the political and value issues that in their shared view underlie the global environmental crisis facing us today They argue that only by transforming our dominant values social institutions and way of living can we avoid ecological disaster
