The Immunochemistry Of Man:

The Immunochemistry of Man George Kwapinski,1991 Presents the antigenic composition of the human body in the states of physical and mental health change due to genetic and environmental influences and in disease and recovery The scientific data in this book is amplified by showing its practical application to medicine and sciences **The Immunochemistry of Cancer** Eugene D. Day,1965 **Immunochemistry of Proteins** M. Atassi,1977 The structural features responsible for the immunogenicity of certain parts of native protein molecules have been of interest to immunochemists and protein chemists for over three decades Following the early work of Landsteiner in 1942 which showed that peptide fragments from silk fibroin exhibited an inhibitory activity toward the reaction of the protein with its antibodies fragments from many other protein systems have been isolated and studied However no concerted effort was or could be devoted to the elucidation of the complete antigenic structure of a protein In order for these endeavors to be successful and meaningful knowledge of both the amino acid sequence and the detailed three dimensional structure of the protein are necessary Such information was not available for a protein until early in the 1960s This and the fact that protein chemistry was not in fact sufficiently developed early in the 1960s to enable the successful completion of the entire antigenic structure of a protein were major contributing factors for the slow progress in this field Determination of the antigenic structures of proteins therefore posed a chemical challenge of enormous proportions For these reasons many investigators diverted their attention to study the immunochemistry of homo or mixed amino acid polymers in the hope that the information derived from these systems may prove useful in the understanding of the immunochemistry of proteins A great many data on these systems were accumulated that have proved valuable in gaining some information on the immune mechanism Research Grants Index National Institutes of Health (U.S.).
