Maunder, 2024-06-20 Maunder s book is more than just a biography of the rise and fall of a complicated man It is also a critique of the damage that myth making and the media can do to an athlete a study of what happens to a demigod when thrown from Mount Olympus The Times Charly Gaul is a forgotten cycling legend Once a household name across Europe the

diminutive Luxembourger won the 1958 Tour de France and the Giro d'Italia twice. A unique rider, Gaul was supremely gifted at climbing and resilient even in the foulest weather. His pedalling style was smooth and swift and he could set an unmatched metronome rhythm on a mountain climb. Mozart on two wheels was how one contemporary writer described him; another dubbed him 'The Angel of the Mountains'. At the end of his cycling career, Gaul disappeared, becoming a hermit living in a forest in Luxembourg. What drove Charly Gaul into a recluse's life? In 'Angel of the Mountains', Paul Maender seeks to uncover the truth about Gaul, his psychology and the circumstances of his withdrawal from society. In rediscovering Gaul's enigmatic life, we find not only an unlikely hero but also a larger truth about the nature of sporting success. **The**

**Militarization of European Space Policy** Thomas Hoerber, Iraklis Oikonomou, 2023-10-30. This book is focused on militarization as the nucleus of EU space policy and the interrelatedness of European security, industrial competitiveness and military capabilities in the shaping of this policy. The EU and key member states have increasingly joined the US, China and Russia among others in regarding space assets as critical military as well as economic, industrial and technological enablers. This book tackles this issue by first shedding light on the military aspects of EU space policy with special emphasis on the security and defence dimensions of projects such as Galileo, Copernicus, Space Situational Awareness and Satellite Communication. In this context, contributors confront the empirical aspect of developments including the role of different institutional actors and the involvement of specific member states. Further, the volume analyses the discursive, ideological, normative and theoretical foundations of the use of space by the EU for strategic purposes, drawing on the broad spectrum of European integration, International Relations theory. Last but not least, the volume discusses initiatives outside the EU by key global space players with an emphasis on the US and transatlantic space relations. All chapters maintain a solid empirical foundation in the form of geographical or issue-related focus with an area-specific emphasis on the EU as a whole, transatlantic relations, the policies of key member states such as France and Italy, and core space powers such as the US, China and India. This book will be of much interest to students of space power, security studies, European politics and International Relations. *Evaluation of Luxembourg's COVID-19 Response: Learning from the Crisis to Increase Resilience*
