The Making Of A Philosopher:

The Making of a Philosopher Colin McGinn, 2011-08-09 Part memoir part study The Making of a Philosopher is the self portrait of a deeply intelligent mind as it develops over a life on both sides of the Atlantic The Making of a Philosopher follows Colin McGinn from his early years in England reading Descartes and Anselm to his years in the states first in Los Angeles then New York McGinn presents a contemporary academic take on the great philosophical figures of the twentieth century including Bertrand Russell Jean Paul Sartre and Noam Chomsky alongside stories of the teachers who informed his ideas and often became friends and mentors especially the colorful A J Ayer at Oxford McGinn s prose is always elegant and probing students of contemporary philosophy and the general reader alike will absorb every page **Socrates in Love** Armand D'Angour, 2019-03-07 An innovative and insightful exploration of the passionate early life of Socrates and the influences that led him to become the first and greatest of philosophers Socrates the philosopher whose questioning gave birth to the ideas of Western thought and whose execution marked the end of the Athenian Golden Age Yet despite his pre eminence among the great thinkers of history little of his life story is known What we know tends to begin in his middle age and end with his trial and death Our conception of Socrates has relied upon Plato and Xenophon men who met him when he was in his fifties and a well known figure in war torn Athens There is mystery at the heart of Socrates story what turned the young Socrates into a philosopher What drove him to pursue with such persistence at the cost of social acceptance and ultimately of his life a whole new way of thinking about the meaning of existence In this revisionist biography Armand D Angour draws on neglected sources to explore the passions and motivations of young Socrates showing how love transformed him into the philosopher he was to become What emerges is the figure of Socrates as never previously portrayed a heroic warrior an athletic wrestler and dancer and a passionate lover Socrates in Love sheds new light on the formative journey of the philosopher finally revealing the identity of the woman who Socrates claimed inspired him to develop ideas that have captivated thinkers for 2 500 years **Making Philosophy Laugh** Dustin Peone, 2023-10-31 Contemporary philosophy has adopted an increasingly tragic point of view Tragedy though is only a partial truth of the human condition Comedy is another partial truth The nature of human existence is neither wholly the one nor the other but tragi comic Philosophy must be attuned to both despair and laughter if it is to understand its own world In Making Philosophy Laugh the philosopher Dustin Peone makes an apology for the comic side of existence and its use in philosophy He demonstrates the social and moral uses of humor and analyzes its significance for speculative thinking Folly and irony are shown to be vital facets of dialectical philosophy The reader is introduced to the comical side of Socrates and Homer Descartes and Vico Kant and Hegel and many others Finally a doctrine of the tragi comic sense of life is presented that does justice to all aspects of human existence and liberates the spirit from the grimness of serious thought **Alciphron: or, The minute philosopher. 1732. Object-Oriented Programming and Petri Nets Gul A. Agha,2001-04-18 Concurrency and distribution have become the
 dominant paradigm and concern in computer science Despite the fact that much of the early research in object oriented
 programming focused on sequential systems objects are a natural unit of distribution and concurrency as elucidated early on
 by research on the Actor model Thus models and theories of concurrency the oldest one being Petri nets and their relation to
 objects are an attractive topic of study This book presents state of the art results on Petri nets and concurrent object oriented
 programming in a coherent and competent way The 24 thoroughly reviewed and revised papers are organized in three
 sections The first consists of long papers each presenting a detailed approach to integrating Petri nets and object orientation
 Section II includes shorter papers with emphasis on concrete examples to demonstrate the approach Finally section III is
 devoted to papers which significantly build on the Actor model of computation **An Essay on the Philosophy of**
