The Transmission of Arbitrary Environmental Information Between Bottlenose Dolphins, Jarvis Bastian, 1967. An investigation was made of the capacity of a pair of bottlenose dolphins to perform a cooperative task which required the acoustical transmission of information about an arbitrary visual event in the environment of one of the animals.

Each animal was first trained to press one of two paddles depending upon the state of a light signal. Next, while housed in adjacent enclosures, they were required to coordinate their actions in a fixed sequence and within fixed time limits. Then the light signal to the animal required to respond first was removed and visual contact with the other animal and its light was eliminated. The pair continued to perform successfully as long as they

were in acoustical contact and the light signal to the one animal was provided Their performance success was found to depend directly upon the emission of pulse trains by the animal receiving the light signal although it was also found to be indirectly connected with that animal s emission of whistle signals The specific nature of this dependency could not be determined Author *Courtship and Mate-finding in Insects* Raymond J.C. Immovable Laws, Irresistible Rights

Christine Pierce,2000 Same sex partnerships Pregnancy through in vitro fertilization Ending one s own life in dignity All are deemed inherently wrong by the standards of natural law ethics but for many people they represent legitimate life choices that are morally right Now a leading feminist critic of the natural law tradition explores the ongoing confrontation between natural law and moral rights to argue that rights constitute a more solid grounding for ethics in human affairs and for feminist thought In this volume Christine Pierce s important essays including the celebrated Natural Law Language and Women expand reflect and refine this central controversy Reaching back to Aristotle and Aquinas and drawing on modern papal encyclicals and Supreme Court cases Pierce demonstrates that the natural law tradition with its doctrine of a supposed hierarchy of natural purpose has served to mystify women s nature and thereby justify restricting women to a predetermined social stratum Addressing issues that concern not only feminism but

legal theory as well she defends her views on equality and universalization against a growing postmodern critique and presents rights theory as an alternative to an ethics of responsibility based on Aristotelian notions of friendship and trust Through tightly constructed arguments presented in engaging prose Pierce conveys her deep knowledge of legal philosophy and her passion for rights as she takes on such issues as AIDS gay marriage animal liberation and feminist separatism She combats the prevailing view of Plato as sexist and explores Sartre s views of holes and slime She also examines the work of contemporary authors in ecology biology sociobiology and religion to reveal their reliance on nature for ethical conclusions and she criticizes recent efforts to root a feminist natural law in Thomism With natural law concepts now in fashion with many conservatives and even some Supreme Court justices Pierce s essays offer a necessary perspective on where current legal and ethical thinking is headed Immovable Laws Irresistible Rights is invigorating reading for all scholars students and interested readers who seek a better understanding of these arguments and the issues affected by them
