## **The Magic Of Numbers:**

The Magic of Numbers Benedict H. Gross, Joe Harris, 2004 The Magic of Numbers was written with two goals in mind first to introduce the reader to some of the beauty of numbers the patterns in their behavior that have fascinated mathematicians for millennia and some surprising applications of those patterns second and equally important to teach the reader something of the mathematical mode of thought the feeling of exploration excitement and discovery that are part of how mathematics is developed The book written originally for the course Quantitative Reasoning 28 that the authors developed and taught at Harvard draws the reader into the content through an engaging and informal writing style Example driven it reduces to a minimum the abstract notation and formal argument that often creates a barrier between mathematicians and students focusing more instead on the experimental aspect of the subject Above all the authors communicate to the reader a sense of the joy and fascination of learning mathematics Additional exercises problems and sample exams are available at [www.prenhall.com/gross](http://www.prenhall.com/gross) Principal topics include Counting and basic combinatorics with applications to probability and games The arithmetic of natural numbers the Euclidean Algorithm and the unique factorization theorem Modular arithmetic including Fermat's Theorem Euler's Theorem and how to take powers and roots Codes how the special properties of ordinary and modular arithmetic in combination allow us to construct the public key codes that help make data transmission secure

**The Magic Numbers of Dr. Matrix** Martin Gardner, 2020-10-06 Martin Gardner's Mathematical Games columns in Scientific American inspired and entertained several generations of mathematicians and scientists Gardner in his crystal clear prose illuminated corners of mathematics especially recreational mathematics that most people had no idea existed His playful spirit and inquisitive nature invite the reader into an exploration of beautiful mathematical ideas along with him These columns were both a revelation and a gift when he wrote them no one before Gardner had written about mathematics like this They continue to be a marvel This volume is a collection of Irving Joshua Matrix columns published in the magazine from 1960-1980 There were several collections of Dr Matrix the first in 1967 they were revised as Gardner reconnected with the good doctor over the years This is the 1985 Prometheus Books edition and contains all the Dr Matrix columns from the magazine
