The Making of the Economy Till D ppe, 2011-11-16 How did modern man come to believe in the object of the economy What hopes made us accept scientific authority about this illusive thing What kinds of persons were attracted by objective knowledge in economic discourse And how does this knowledge guide our economic life The Making of the Economy tackles such questions surrounding the modern notion of the economy with a fresh look from phenomenological philosophy In a historical narrative of economic discourses Till D ppe shows that only due to the scientific culture of economics we speak of an economy Economic science made the economy Our economic experiences alone do not trigger an interest in the economy which makes Husserl s case for the forgetfulness of the life world D ppe s historical narrative focuses on the emergence of formal economic analysis out of a series of successive life worlds or concrete historical situations an approach which generates a new substantive understanding of both the history of economics and the current discourse of crisis surrounding economics The book will appeal to historians and philosophers of the social sciences as well as scholars of history philosophy and economics

The Making of Economic Policy Avinash K.

Dixit,1998-09-01 The Making of Economic Policy begins by observing that most countries trade policies are so blatantly contrary to all the prescriptions of the economist that there is no way to understand this discrepancy except by delving into the politics The same is true for many other dimensions of economic policy Avinash Dixit looks for an improved understanding of the politics of economic policy making from a transaction cost perspective Such costs of planning implementing and monitoring an exchange have proved critical to explaining many phenomena in industrial organization Dixit discusses the variety of similar transaction costs encountered in the political process of making economic policy and how these costs affect the operation of different institutions and policies Dixit organizes a burgeoning body of research in political economy in this framework He uses U S fiscal policy and the General Agreement on Tariffs and Trade GATT as two examples that illustrate the framework and show how policy often deviates from the economist s ideal of efficiency The approach reveals however that some seemingly inefficient practices are quite creditable attempts to cope with transaction costs such as opportunism and asymmetric information Copublished with the Center for Economic Studies and the Ifo Institute *The Economic Review* ,1896 Annual Register University of Chicago,1899 American Economist ,1891
