Pal,Ashish Ghosh,Malay K. Kundu,2012-11-27 Any task that involves decision making can benefit from soft computing techniques which allow premature decisions to be deferred The processing and analysis of images is no exception to this rule In the classical image analysis paradigm the first step is nearly always some sort of segmentation process in which the image is divided into hopefully meaningful parts It was pointed out nearly 30 years ago by Prewitt 1 that the decisions involved in image segmentation could be postponed by regarding the image parts as fuzzy rather than crisp subsets of the image It was also realized very early that many basic properties of and operations on image subsets could be extended to fuzzy subsets for example the classic paper on fuzzy sets by Zadeh 2 discussed the set algebra of fuzzy sets using sup for union and inf for intersection and extended the defmition of convexity to fuzzy sets These and similar ideas allowed many of the methods of image analysis to be generalized to fuzzy image parts For are cent review on geometric description of fuzzy sets see e g 3 Fuzzy methods are also valuable in image processing and coding where learning processes can be important in choosing the

Fuzzy Filters for Image Processing Mike Nachtegael,Dietrich van der Weken,Dimitri van de Ville,Etienne E.

Kerre,2013-06-05 The ongoing increase in scale of integration of electronics makes storage and computational power affordable to many applications Also image process ing systems can benefit from this trend A variety of algorithms for image processing tasks becomes close at hand From the whole range of possible approaches those based on fuzzy logic are the ones this book focusses on A particular useful property of fuzzy logic techniques is their ability to represent knowledge in a way which is comprehensible to human interpretation The theory of fuzzy sets and fuzzy logic was initiated in 1965 by Zadeh and is one of the most developed models to treat imprecision and uncertainty Instead of the classical approach that an object belongs or does not belong to a set the concept of a fuzzy set allows a gradual transition from mem bership to nonmembership providing partial degrees of membership Fuzzy techniques are often complementary to existing techniques and can contribute to the development of better and more robust methods as has already been illustrated in numerous scientific branches The present book resulted from the workshop Fuzzy Filters for Image Processing which was organized at the 10th FUZZ IEEE Conference in Mel bourne Australia At this event several speakers have given an overview of the current state of the art of fuzzy filters for image processing Afterwards the book has been completed with contributions of other international re searchers **Intelligent Systems** Chiranji Lal Chowdhary,2019-12-06 This volume helps to fill the gap between data analytics image processing and soft computing practices Soft computing methods are used to focus on data analytics and image processing to develop good intelligent systems To this end readers of this volume will find quality research that presents the current trends advanced methods and hybridized techniques relating to data analytics and intelligent systems The book also features case studies related to medical diagnosis with the use of image processing and soft computing algorithms in particular models Providing extensive coverage of biometric systems soft computing image processing artificial intelligence and data analytics the chapter authors discuss the latest research issues present solutions to research problems and look at comparative analysis with earlier results Topics include some of the most important challenges and discoveries in intelligent systems today such as computer vision concepts and image identification data analysis and computational paradigms deep learning techniques face and speaker recognition systems and more **Neural Networks and Soft Computing** Leszek Rutkowski,2013-03-20 This volume presents new trends and developments in soft computing techniques Topics include neural networks fuzzy systems evolutionary computation knowledge discovery rough sets and hybrid methods It also covers various applications of soft computing techniques in economics mechanics medicine automatics and image processing The book contains contributions from internationally recognized scientists such as Zadeh Bubnicki Pawlak Amari Batyrshin Hirota Koczy Kosinski Nov k S Y Lee Pedrycz Raudys Setiono Sincak Strumillo Takagi Usui Wilamowski and Zurada An excellent overview of soft computing methods and their applications Soft Computing Approach Pattern Recognition And Image Processing Ashish Ghosh,Sankar Kumar Pal,2002-11-25 This volume provides a collection of sixteen articles containing review and new material In a unified way they describe the recent development of

theories and methodologies in pattern recognition image processing and vision using fuzzy logic artificial neural networks genetic algorithms rough sets and wavelets with significant real life applications The book details the theory of granular computing and the role of a rough neuro approach as a way of computing with words and designing intelligent recognition systems It also demonstrates applications of the soft computing paradigm to case based reasoning data mining and bio informatics with a scope for future research The contributors from around the world present a balanced mixture of current theory algorithms and applications making the book an extremely useful resource for students and researchers alike

Hybrid Soft Computing for Multilevel Image and Data Segmentation Sourav De,Siddhartha Bhattacharyya,Susanta Chakraborty,Paramartha Dutta,2016-11-25 This book explains efficient solutions for segmenting the intensity levels of different types of multilevel images The authors present hybrid soft computing techniques which have advantages over conventional soft computing solutions as they incorporate data heterogeneity into the clustering segmentation procedures This is a useful introduction and reference for researchers and graduate students of computer science and electronics engineering particularly in the domains of image processing and computational intelligence **Special issue: Soft computing for medical image processing** Y. Hata,2001 **Image Quality Assessment of Computer-generated Images** André Bigand,Julien Dehos,Christophe Renaud,Joseph Constantin,2018-03-09 Image Quality Assessment is well known for measuring the perceived image degradation of natural scene images but is still an emerging topic for computer generated images This book addresses this problem and presents recent advances based on soft computing It is aimed at students practitioners and researchers in the field of image processing and related areas such as computer graphics and visualization In this book we first clarify the differences between natural scene images and computer generated images and address the problem of Image Quality Assessment IQA by focusing on the visual perception of noise Rather than using known perceptual models we first investigate the use of soft computing approaches classically used in Artificial Intelligence as full reference and reduced reference metrics Thus by creating Learning Machines such as SVMs and RVMs we can assess the perceptual quality of a computer generated image We also investigate the use of interval valued fuzzy sets as a no reference metric These approaches are treated both theoretically and practically for the complete process of IQA The learning step is performed using a database built from experiments with human users and the resulting models can be used for any image computed with a stochastic rendering algorithm This can be useful for detecting the visual convergence of the different parts of an image during the rendering process and thus to optimize the computation These models can also be extended to other applications that handle complex models in the fields of signal processing and image processing *Medical Image Processing* Satya Prakash Yadav,Abhishek Kumar,Ashutosh Kumar Dubey,Victor Hugo C. de Albuquerque,Adrian Rodriguez-Aguiñaga,Angeles Quezada,2024-09-23 The goal of this book is to facilitate and stimulate cross disciplinary research in the emerging paradigm of Medical Imaging Especially this book is to focus on analysing and articulating proven
