Soldiers For Peace Critical Operational Issues:

Soldiers for Peace Bruce Pirnie, William E. Simons, 1996 Defines peace operations using examples from the Congo to Croatia **Status of Personnel, Use of Force, and International Law of Armed Conflict in the Context of New United Nations Peacekeeping Operations** Jeffrey Walker, 1998 With the end of the Cold War and the resurgence of dormant ethnic and intrastate conflicts within many nations the demands for international forces to keep the peace ensure humanitarian relief and secure democratic institutions in splintering states around the world have increased dramatically. The United States has significantly increased its own involvement in United Nations operations. At the same time as demands for forceful intervention have increased events in Bosnia, Somalia, Haiti and other troubled areas around the world have revealed shortfalls in the developed world's ability to deal with the non-traditional missions of nation building, securing humanitarian rights and large scale peace enforcement operations. A fundamental question arises in the face of these new operations: how well do rules developed during the era of limited classical peacekeeping fit these new missions? Can the old rules still apply in this new age of peace operations? Part of the problem in applying classical peacekeeping rules today is that they are a mishmash of guidelines on when to intervene and once a decision to intervene is made what the rules on the use of force should be. The issue of regulation of the use of force in peacekeeping and humanitarian missions is covered. A third important issue the legal status of United Nations forces engaging in new types of expanded peace operations and their resulting obligations under the international law of armed conflict is also discussed.

Air Power as a Coercive Instrument Daniel Byman, John G. McGinn, Keith Crane, Seth G. Jones, Rollie Lal, Ian O. Lesser, 1999-08-20 Coercion: the use of threatened force to induce an adversary to change its behavior is a critical function of the U.S. military. U.S. forces have recently fought in the Balkans, the Persian Gulf and the Horn of Africa to compel recalcitrant regimes and warlords to stop repression, abandon weapons programs, permit humanitarian relief and otherwise modify their actions. Yet despite its overwhelming military might, the United States often fails to coerce successfully. This report examines the phenomenon of coercion and how air power can contribute to its success. Three factors increase the likelihood of successful coercion: 1) the coercer's ability to raise the costs it imposes while denying the adversary the chance to respond; 2) an ability to block an adversary's military strategy for victory; and 3) an ability to magnify third party threats such as internal instability or the danger posed by another enemy. Domestic political concerns such as casualty sensitivity and coalition dynamics often constrain coercive operations and impair the achievement of these conditions. Air power can deliver potent and credible threats that foster the above factors while neutralizing adversary countercoercive moves. When the favorable factors are absent, however, air power or any other military instrument will probably fail to coerce. Policymakers' use of coercive air power under inauspicious conditions diminishes the chances of using it elsewhere when the prospects of success would be greater.

The Responsibility to Protect International Commission on Intervention and State Sovereignty, International Development

Research Centre (Canada), 2001 Responsibility to Protect Research bibliography background Supplementary volume to the Report of the International Commission on Intervention and State Sovereignty *The art of military coercion* Rob de Wijk, 2014-05-09 The United States spends more on its military than the rest of the world combined And Western nations in general spend far more than developing nations around the globe Yet when Western nations have found themselves in conflicts in recent decades their performance has been mixed at best In his fully updated new edition of *The Art of Military Coercion* Rob de Wijk presents a theory on the use of force He argues that the key is a failure to use force decisively to properly understand the dynamics of conflict and balance means and ends Without that ability superiority of dollars numbers and weaponry won't necessarily translate to victory Rob de Wijk is the Director of the Hague Centre for Strategic Studies HCSS and Professor of International Relations and Security at the Campus the Hague of Leiden University He was previously a Professor in the field of International Relations at the Royal Netherlands Military Academy and Head of the Defense Concepts Department at the Dutch Ministry of Defense

Genocide and the Global Village K. Campbell, 2001-09-07 A half century ago the international community made a solemn promise to never again allow genocide to go unchallenged In the early days of the Post Cold War New World Order though international leaders failed to stop horrific genocides in Bosnia and Rwanda chiefly because Western leaders lack the political will to use decisive force to suppress ongoing genocide Despite increased attention to war crimes issues in the Clinton Administration and increased rhetoric about its commitment to halting genocide American military force policy still gives lowest priority to responding to gross abuses of human rights In *Genocide and the Global Village* Kenneth Campbell explains why the international community fails so miserably to prevent suppress and punish contemporary genocide The book integrates the scattered pieces of this complex problem political military legal and ethical into a more complete clearer picture of the challenge facing the world today Campbell engages in a complex multi level analysis of genocide's impact upon world order and the inter play of politics and morality in the international community's determination of the appropriate role for military force in halting genocide and securing an emerging global civil society Campbell recommends practical steps the international community can take to greatly improve its response the next time genocide occurs a next time that will occur

Right Backed by Might Roger Beaumont, 2001-02-28 This study provides an overview of the International Air Force IAF concept which emerged in the early 20th century out of a long progression of schemes for creating multi national armed forces to enforce the peace most often referred to as an international police force IPF After broadly tracing the IAF's complex lineage Beaumont surveys the proliferation of IPF and IAF proposals throughout the 20th century including schemes offered by Kipling H G Wells and Theodore Roosevelt Later ideas included the Allies Independent Air Force of 1917 18 the evolution of the League to Enforce Peace into the League of Nations imperial air policing between the World Wars and a host of proposals official and informal such as visions of a United Nations IAF and the ad hoc coalition air forces assembled by the major western powers in the Gulf

War and the Balkans in the 1990s The IAF concept gained far greater popularity even among contemporary historians than is generally appreciated Beaumont interweaves the review of the IAF and IPF designs with diplomacy and war especially the rise of air power and the confounding of its advocates visions of a cheap quick road to victory Based on Beaumont s survey of secondary and primary sources during more than a decade of research this book considers the IAF image from such diverse perspectives as pacifism popular culture and collective security Soldiers for Peace: Critical Operational Issues ,1996 As a power with global interests the United States has a strong concern for successful peace operations Seldom if ever will its interests be well served by failures especially widely publicized and expensive failures that tend to discredit the United Nations This report develops issues associated with peace operations conducted under authority of the United Nations either through the United Nations system or by other agents At the outset it offers commentary on questions raised by The Clinton Administration s Policy on Reforming Multilateral Peace Operations hereafter Administration s Policy Should the United States vote affirmatively Should the United States participate with its own personnel Every member state with a seat on the Security Council must answer the first question and many member states will also have to consider whether they should contribute troops But U S decisions carry the greatest weight and are often critical especially its decision to participate When the United States decides to participate in a peace operation its immense power and prestige radically increase the chances for success Joint Force Quarterly ,1996 Annual Report Rand Corporation,1996 Department of Defense Authorization for Appropriations for Fiscal Year 1998 and the Future Years Defense Program: Military posture, service secretaries, service chiefs, United Commands, Department of Energy United States.
