**Image** Sergio Vitulano,2003 This volume emphasizes the primary role played by images in computer science In the last two decades images have replaced written texts the enormous possibilities of the image language have overcome written language in an ever more restricted ambit An image is better than one thousand words so it was straightforward to apply visual language in the field of computer science Nowadays everything that appears on a computer screen is an image regardless of whether it is a word or a picture Is it possible to realize an e learning program without working in terms of images The answer is undoubtedly no even if several problems arise in this context the qualitative and quantitative content of the image we need to use for a specific task the psychological effect on the user including the level of attention and the correct perception of the image significance Most of these problems form the basis of

image understanding techniques Widespread use of images requires organization of the information in the databank or database whose dimensions are sometimes so wide as to be too complex to manage therefore information retrieval techniques arise from this need The new instruments used in image and or remote diagnosis image transmission the respect of the law in force and the ever more relevant image storage capacity required for this task imply the use of techniques of visual language and information retrieval The proceedings have been selected for coverage in OCo Index to Scientific Technical Proceedings ISTP ISI Proceedings OCo Index to Scientific Technical Proceedings ISTP CDROM version ISI Proceedings

Technology Forecast & Assessment Committee,1975 Requirements Engineering Project-Based Learning Model Using the Electronic Learning Software Engineering System (ELINS) Nor Azliana Akmal Jamaludin,2015-09-21 Doctoral Thesis Dissertation from the year 2014 in the subject Computer Science Software grade Pass University of Technology Malaysia Faculty of Computing course Software Engineering Education language English abstract The success of software project depends on how well it fits the needs of its user and its environment This research strongly believes that future Requirement Engineering RE engineers should have the necessary generic skills in order to improve the quality of producing Software Requirement Specification The software industry claims that the software engineering graduates are not able to meet their requirements for employability Thus confronting the problems right from the Higher Learning Education level that lead to this disparity

will save the software industry the cost of sending new employees for additional training The objectives of this research are to develop new learning environment model that can be implemented in RE education construct a prototype namely Electronic Learning Software Engineering System ELINS that allows the industry educators and Software Engineering SE undergraduate students to actively communicate and collaborate and measure the effectiveness of the proposed learning model in teaching RE and enhancing the generic skills of SE undergraduates This research comprises of pilot and main study to gather the requirement from experience of software industry personnel before evaluating the students after they involve in experimental test The interview findings from the pilot study provided inputs which guide this research to develop the actual questionnaire for the main study The study discusses the factors causes expected attributes and importance of allowing undergraduates to improve their generic skills through actual hands on participation Rasch Measurement Model s software WinStep is used to analyze the raw data In experimental test students are provided with opportunities to practise how to deliver the SRS by doing several case studies from the software industry The analysis and results have shown a positive improvement of the generic skills among the students who were involved in the Requirement Engineering Project Based Learning RE PjBL model environment compared to those who were taught the course by traditional methods with minimal cost The results conclude that the RE PjBL which are facilitated by ELINS can enhance student s knowledge skills and attitude effectively
