## **Solar Dwelling Design Concepts:**

*Solar Dwelling Design Concepts* AIA Research Corporation, US Department of Housing, 2003-11 This publication is about solar energy and how its use for heating and cooling will affect dwelling design and site planning. It has been prepared as a brief introduction for consumers, designers and builders interested in solar heating and cooling. Beginning with a brief history of solar energy applications, a more thorough description of solar components and how they are organized into heating, cooling and domestic hot water systems follows. Next, factors which influence the design of solar dwellings and systems are discussed. The remainder portion of the publication illustrates dwelling and site design concepts responsive to these factors for various housing types, solar systems and climates.
