**The Moon's Galactic History** Constance Victoria Briggs, 2022-10-28. The Moon's Galactic History: A Look at the Moon's Extraterrestrial Past and Its Connection to Earth follows the past and present research about the Moon's strange enigmatic history with a focus on an extraterrestrial presence. The book examines such questions as: Are there Moon inhabitants? Are the UFOs seen today connected to the Moon? Is there a city on the Moon and more? Additionally, Briggs discusses things observed on the Moon including anomalous strange lights, unidentified flying objects, odd constructions, artifacts, symbols and more. This book examines new thoughts and ideas from researchers and what their ideas are today about the extraterrestrial Moon-Earth connection and what it means for us. With all the information on unidentified flying objects in the news today, it is time to have an updated book with current research that investigates both the past and present material on the Moon. Did you know that several of the NASA astronauts reported seeing UFOs while traveling to the Moon? The Moon might be hollow. Apollo 10 astronauts heard strange space music when traveling on the far side of the Moon. Mysterious anomalous activity has been seen on the Moon for centuries; there are said to be ruins of structures on the Moon and more.
